

Ibbotson **Alternative Trusts**

Product Disclosure Statement

15 April 2010

-
- ▶ **Multi-manager**
 - ▶ **Access to specialist investment managers**
 - ▶ **Alternative strategy investment portfolios**
-

The issuer and Responsible Entity is:
IOOF Global One Limited
ABN 54 093 415 251 AFS Licence No. 234432

Important notes:

This Product Disclosure Statement (PDS) is an important document that should be read before making a decision to invest in the Ibbotson Alternative Trusts (Trusts).

In particular, you should read this PDS carefully and:

- ▶ assess whether the investment is appropriate for you before making a decision to acquire units in the Trusts;
- ▶ evaluate the taxation implications of investing in the Trusts; and
- ▶ consider talking to financial and tax advisers before making an investment decision.

The information contained in this PDS is general information only and is not intended to take into account your own personal objectives, financial situation or particular needs. You should read this PDS in its entirety carefully and assess whether the product is appropriate for you and discuss this with your financial adviser before you make an investment decision. In any event, the information in this PDS is not intended to contain any recommendations, statements of opinion or advice. It has been prepared to assist you to compare this product to others you may consider.

This PDS and the offer of units in the Trusts are available only to Australian resident investors receiving this PDS (including electronically) in Australia and to New Zealand residents who are wholesale investors where permitted by Australian and New Zealand law. Other applications from outside Australia will not be accepted.

If you are printing an electronic copy of this PDS you must print all pages including the application form and any supplementary documents (if applicable). If you make this PDS available to another person, you must give them the entire electronic file or printout, including the application form and any supplementary documents (if applicable). You can obtain a paper copy of this PDS (and any supplementary documents if applicable) free of charge by contacting Ibbotson Associates Australia Limited (Ibbotson).

Units in the Trusts can only be issued if you use an application form attached to either a paper or electronic copy of this PDS or for additional investments, another method agreed with us.

If you are selecting one or more of the Trusts through an Investor Directed Portfolio Service (IDPS), please refer to your IDPS operator or your financial adviser for information on how to invest in the Trusts. Please also refer to page 46 for information for Indirect Investors. The Responsible Entity consents to the use of this PDS by IDPS Operators who include the Trusts on their investment menus.

The value of your investment may rise and fall, and at times your returns may be negative. Neither Ibbotson, Morningstar, the Responsible Entity, nor any of their related companies, directors, officers, any of their service providers or the investment managers appointed by the Responsible Entity guarantee that your investment will appreciate in value or retain its value, guarantee the repayment of capital or guarantee the performance of any of the Trusts. Investments in the Trusts are subject to investment risks including possible delays in repayment and loss of income or of capital invested.

The issue of this PDS is authorised solely by the Responsible Entity. Apart from the Responsible Entity, no other person or company (whether or not related to the Responsible Entity) is responsible for any statement or information contained in this PDS.

IOOF Global One Limited is the Responsible Entity of the Trusts. As the Responsible Entity it is, amongst other things, responsible for complying with the Corporations Act 2001, the Constitutions and the compliance plans (see page 35), and for acting in the best interests of unitholders. The Responsible Entity may also use the services of related and third parties to perform its duties.

The Responsible Entity has entered into an investment management agreement with Ibbotson under which the Responsible Entity delegates the day to day investment management and operation of the Trusts to Ibbotson.

Ibbotson is the Investment Manager of the Trusts (and agent for the Responsible Entity) and has consented to being referred to as such throughout this PDS. Ibbotson Associates Australia Limited was formerly known as Intech Fiduciaries Limited. Morningstar has consented to being referred to throughout this PDS.

Ibbotson is entitled, under the investment management agreement, to require IOOF Global One Limited to retire as Responsible Entity of any of the Trusts. In that case, a meeting of unitholders in the relevant Trust(s) would be called in accordance with the Corporations Act 2001 to vote on the issue and appoint a replacement responsible entity.

A custodian has been appointed to hold and maintain certain Trust assets as agent of the Responsible Entity. The Responsible Entity reserves the right to change the custodian.

Information set out in this PDS is subject to change from time to time. Information not materially adverse to investors in the Trusts may be amended without issuing an updated or supplementary PDS. You can find this updated information on Ibbotson's website at www.ibbotson.com.au. You will be provided with a paper copy of any updated information free of charge, on request. You can also find some further information on Ibbotson's website in relation to terms used in this PDS which is incorporated by reference into this document. Unless stated otherwise, all fees are inclusive of GST after taking into account any expected reduced input tax credits.

All monetary amounts referred to in this PDS are given in Australian dollars (unless otherwise specified).

You should retain a copy of this PDS and any other supplementary material for future reference. You should consider all current information when making an initial investment or ongoing investment in the Trusts.

About Ibbotson Associates

Ibbotson is a leading provider of Australian investment portfolio solutions, backed by capital markets and investment manager research. The company advises and manages funds for superannuation funds, institutions, platform distributors, financial advisers and individuals.

Founded in 1989 as Intech, the company was acquired by Morningstar in 2009. It now forms part of Ibbotson Associates, Inc., a Morningstar company. Morningstar is a leading provider of investment research. Ibbotson Associates, Inc., is a highly respected leader in the areas of asset allocation, portfolio consultation and retirement advice provision in the United States and in international markets.

Through the Ibbotson Trusts, Ibbotson manage a range of single sector, alternative strategy and diversified investment portfolios.

The combination of Ibbotson's global links and research from a leading global hedge fund adviser enhances Ibbotson's investment research capabilities and access to quality managers around the world.

Definitions in this PDS

'AFS Licence' means Australian Financial Services Licence.

'ASIC' means the Australian Securities and Investments Commission.

'Basket of Investments' means the notional portfolio of global trading strategy or hedge fund investments and cash on which the economic returns of a Total Return Swap are based.

'Business Day' means any day other than Saturday and Sunday during which banks are open for general banking business in the state of New South Wales.

'Constitutions' means the Constitution of the Ibbotson Global Trading Strategies Trust dated 14 March 2007 or the Ibbotson Alpha Strategies Trust dated 25 June 2007 or the Ibbotson Alternative Markets Trust dated 29 October 2007, as amended from time to time, or the Constitutions for all of the Trusts, as the context indicates.

'Direct Investor' is a wholesale investor as defined in section 761G of the Corporations Act 2001 or a Staff Investor.

'Ibbotson' means Ibbotson Associates Australia Limited ABN 54 071 808 501, AFS Licence No. 228986, the Investment Manager of the Trusts.

'Ibbotson Alternative Trusts' means all of the following trusts:

- ▶ Ibbotson Global Trading Strategies Trust (ARSN: 124 464 704 APIR: INT0089AU)
- ▶ Ibbotson Alpha Strategies Trust (ARSN: 126 314 538 APIR: INT0098AU)
- ▶ Ibbotson Alternative Markets Trust (ARSN: 128 307 004 APIR: INT0095AU)

'IDPS' means a master trust, wrap account, investor directed portfolio service or similar product.

'Indirect Cost Ratio (ICR)' means the ratio of a Trust's management costs, that are not deducted directly from a unitholder's account, to the Trust's total average net assets.

'Indirect Investor' is an investor who gains exposure to the Trusts through an IDPS.

'IOOF Global One Limited' or **'the Responsible Entity'** means IOOF Global One Limited ABN 54 093 415 251, AFS Licence No. 234432, the issuer of units in the Trusts and of this PDS and the Responsible Entity of the Trusts.

'NAV' means the Net Asset Value of a Trust and is the value of all assets of the Trust less liabilities of the Trust (excluding any amount representing the value of the investors' interests in the Trust or rights attaching to units, unless they have become due and payable to the relevant investor, regardless of whether characterised as equity or debt in the accounts of the Trusts) and is calculated in accordance with the Constitution of the Trusts.

'**PDS**' means this Product Disclosure Statement.

'**RITC**' means Reduced Input Tax Credit as defined in A New Tax System (Goods and Services Tax) Act 1999.

'**RTGS**' means Real Time Gross Settlement whereby settlement of payments occurs simultaneously with delivery of payments (i.e. in real time) for full value of each payment.

'**Staff Investor**' is an investor who is an employee as defined by internal human resource policies and procedures governing the staff investment program.

'**Trusts**' means the Ibbotson Alternative Trusts.

'**Total Return Swap**' is the term given to a derivative contract and other documentation between the Responsible Entity and the applicable counterparty (currently Macquarie Bank Limited (Macquarie)) under which the Ibbotson Global Trading Strategies Trust or Ibbotson Alpha Strategies Trust (as the case may be) is provided with exposure to economic returns linked to a Basket of Investments in return for the payment of an agreed cash flow.

'**Transaction Day**' means the last Business Day of each month.

'**you**' or '**your**' means an investor or prospective investor in the Trusts.

Key Features

The Ibbotson Alternative Trusts have the following key features:

	Ibbotson Global Trading Strategies Trust¹	Ibbotson Alpha Strategies Trust²	Ibbotson Alternative Markets Trust³
Investment objective ⁴	To maximise performance relative to the benchmark over rolling 5 year periods.	To maximise performance relative to the benchmark over rolling 5 year periods.	To maximise performance relative to the benchmark over rolling 5 year periods.
Investment strategy	The Trust offers exposure to global market selection strategies, across a range of currencies and asset classes, including equities, fixed income, commodities and volatility strategies. These strategies seek to profit from short-term changes in the relative value of currencies and global investment markets. Exposure to these global trading strategies is achieved via a Total Return Swap.	The Trust offers exposure to a diversified portfolio of hedge funds, that seek to generate returns from active management rather than through market exposures. Strategies may include global trading strategies, equity market neutral, credit, event driven, relative value, equity long short and multi-strategy hedge funds. Exposure to hedge funds are accessed via direct investment in the Ibbotson Global Trading Strategies Trust and via a Total Return Swap.	The portfolio will be invested in an underlying mix of liquid alternative markets which are expected to generate returns in excess of cash and have low to moderate correlations to fixed interest and equity markets.

Key risks	Counterparty risk Liquidity risk Leverage risk	Counterparty risk Liquidity risk Leverage risk	Asset class risk

Notes

1. Prior to 15 April 2010, this trust was called the Intech Global Trading Strategies Trust.
2. Prior to 15 April 2010, this trust was called the Intech Alpha Strategies Trust.
3. Prior to 15 April 2010, this trust was called the Intech Alternative Markets Trust.
4. Investment objective is expressed net of underlying manager fees but before our management and performance fee, expense recoveries and taxation, i.e. performance is measured relative to the benchmark before fees and costs and taxes are deducted. Please refer to pages 21–29 for details on fees and costs and pages 30–34 for details on taxation. The investment objective is not intended to be a forecast. It is merely an indication of what the Trust aims to achieve over the medium to long-term. A Trust might not be successful in meeting its investment objective. Returns are not guaranteed.
5. Risk profiles help to understand where each Trust is positioned on the risk/return spectrum. Please refer to figure 4 on page 14 of the investment risk and return spectrum.
6. This is the recommended investment timeframe. Please note that for the Ibbotson Global Trading Strategies Trust and the Ibbotson Alpha Strategies Trust, a 12 month lock-up period applies to all monies you invest in the Trust, from the date you purchase each unit. This means, that you will not be able to redeem during the first 12 months for each unit you purchase. Please refer to the section 'Liquidity risk' on page 18 for more information.
7. Funds Under Management as at 31 December 2009 is calculated based on NAV.

Ibbotson Alternative Trusts

The Ibbotson Alternative Trusts are registered managed investment schemes (unit trusts) that are designed to provide solutions to investors seeking alternative investment portfolios. The Trusts have been designed to complement investments in a traditional diversified portfolio by providing exposure to alternative strategies and asset classes with the aim of enhancing returns and reducing the overall risk of a diversified portfolio.

A description of each Trust is outlined below:

Ibbotson Global Trading Strategies Trust

A multi-manager hedge fund portfolio focused on global trading strategies that seek to profit from short-term changes in the relative value of currencies and global investment markets, such as global macro, global tactical asset allocation, volatility arbitrage, managed futures and commodity trading advisor (CTA) strategies. These strategies involve taking positive (long) and negative (short) positions to profit from positive and negative investment views. The key driver of returns is expected to be the skill set of the underlying managers rather than market exposures. This fund is designed to generate comparable levels of risk and return to those of equity markets, over the medium to long term.

The underlying investments are accessed via a Total Return Swap. Refer to pages 11–13 for more information on the Total Return Swaps.

Ibbotson Alpha Strategies Trust

A multi-manager hedge fund portfolio invested across a diverse range of hedge fund strategies that are expected to have low to medium correlations to equity and government bond markets, over the medium term to long term. Strategies may include global trading strategies, equity market neutral, credit, event driven, relative value, equity long short and multi-strategy hedge funds. The allocations to these strategies are varied over time to exploit market opportunities and the emergence of new strategies. The key driver of returns is expected to be the skill set of the underlying managers rather than market exposures. This fund is designed to generate less risk than equity markets and higher returns than bond markets, over the medium to long term.

The Trusts' underlying investments are accessed via direct investment in the Ibbotson Global Trading Strategies Trust and via a Total Return Swap. The Trust may also invest in the Ibbotson Cash Trust. Refer to the Ibbotson Investment Trusts Product Disclosure Statement for more information on the Ibbotson Cash Trust and pages 11–13 for more information on the Total Return Swaps.

Ibbotson Alternative Markets Trust

A diversified portfolio of liquid asset classes expected to have low correlations to equity and fixed interest over the medium to long-term.

The Trust invests in global listed infrastructure and commodities and may invest in other alternative assets and strategies. The global listed infrastructure strategy is customised, with investment concentrated on those sectors which are expected to produce less volatile returns and have lower equity market correlation than the standard global indices. All investments are hedged back to the Australian dollar.

Benefits of the Ibbotson Alternative Trusts

Alternative Investments are increasingly being seen as an integral part of a diversified portfolio. The benefits specific to the Trusts include:

Diversification

Conventional diversified portfolios are heavily dependent on traditional assets. Alternative investments have different features to traditional assets producing returns with a low correlation to traditional assets. When the Trusts are included in a diversified portfolio, they can assist to smooth out and improve total portfolio returns by relying less on the performance of traditional equity and fixed interest markets and reducing the overall volatility of the portfolio.

Fight inflation

The Trusts include alternative assets and strategies that can combat rising inflation such as infrastructure assets in the Ibbotson Alternative Markets Trust.

Access to specialist investment skills

The Trusts provide access to specialist investment managers not generally made available to Australian and New Zealand retail investors and to assets or strategies with limited capacity.

Experienced investment professionals

The Trusts provide investors with access to scale and investment expertise. Ibbotson's investment professionals, who manage the Trusts, are experienced in portfolio construction, asset allocation, manager configuration, manager selection and monitoring and investment administration.

Ibbotson’s approach to alternative investments

In managing the Trusts, Ibbotson aims to deliver consistent investment returns by applying a disciplined investment process built around in-depth research and combining high quality specialist investment managers.

Ibbotson believes successful investing in alternative investments requires an experienced team, with global access to manager and market research, innovation and importantly, a total portfolio perspective.

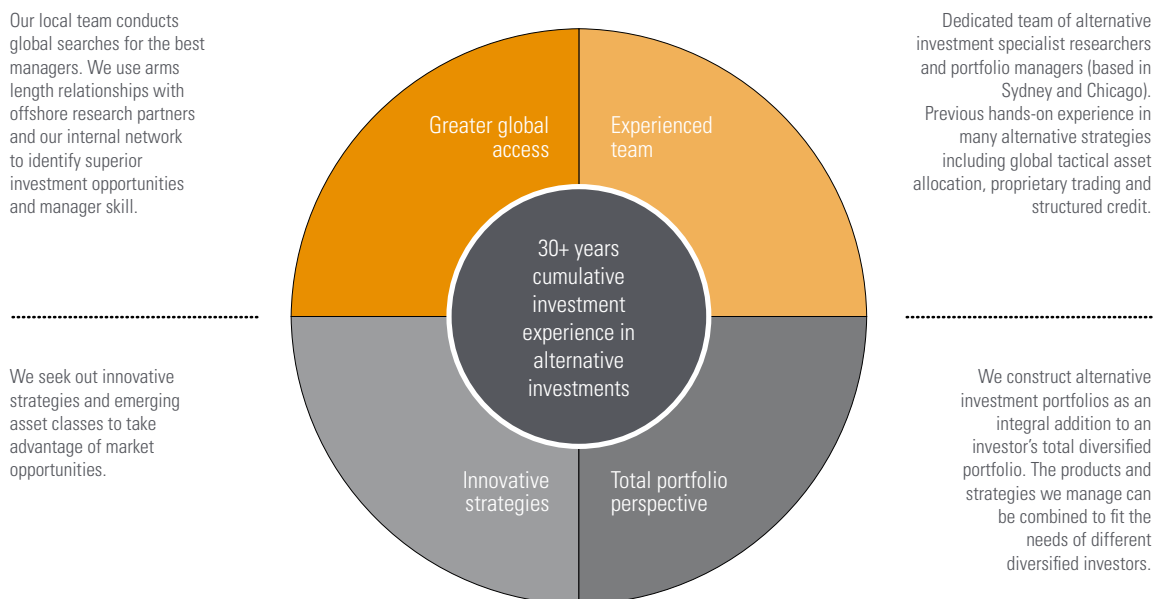

Ibbotson considers alternative investments to be any asset class or investment strategy which behaves differently to traditional asset classes (i.e. listed equities, listed property, fixed interest and cash). The more commonly known alternatives include hedge funds, infrastructure and commodities.

There are two types of alternative investments that returns can be derived from: alternative strategies and alternative assets.

Alternative strategies seek to generate a positive return rather than ‘beat the market’. Additionally they have greater discretion in what they can invest in and the techniques used, such as hedging and short selling to profit from negative views. Returns are driven more by skill and less by the direction of investment markets.

Alternative assets have different risks and drivers of returns than traditional assets. For example, commodity prices reflect current demand and supply for natural resources and agricultural goods whereas equities are driven by expectations of future corporate profits. Returns from alternative assets reflect these underlying economic factors rather than manager skill. Alternative assets include direct property and unlisted infrastructure as well as more liquid asset classes such as commodities, which are traded on a daily basis, much like equities.

Figure 1. Ibbotson’s approach to alternative investments

Sub-sets of fixed interest and equity markets may also provide exposure to assets that have unique characteristics including listed infrastructure or mortgages.

Investment management

Ibbotson follows a rigorous investment discipline, building on its beliefs which involves a continual process of analysis and identification, selection, capital allocation, implementation and review in order to deliver on its investment objectives.

Authorised investments

Ibbotson Global Trading Strategies Trust invests directly into a Total Return Swap to provide investors with a comparable return to a multi-manager global trading strategies portfolio.

The Ibbotson Alpha Strategies Trust's investments are accessed via direct investment in the Ibbotson Global Trading Strategies Trust, Ibbotson Cash Trust and a Total Return Swap, which in turn provides investors with a comparable return to a diversified hedge fund portfolio.

The Ibbotson Alternative Markets Trust invests in managed investment schemes with exposure to commodities and infrastructure assets and may invest in cash.

These Trusts are also permitted, subject to law, to invest in any investment or asset class including companies and managed investment schemes domiciled in Australia and overseas that hold a broad range of investments including swaps, notes, futures contracts, options and forward contracts for commodities, foreign exchange, fixed income and equity market indices.

Ethical statement

Ibbotson does not explicitly take into account labour standards or environmental, social or ethical considerations when making investment decisions for the Trusts or when appointing or monitoring investment managers. The investment managers selected are not required to take any such considerations into account when making their investment decisions, however this may change in the future.

Figure 2. Ibbotson's disciplined investment process

Total Return Swaps

The Ibbotson Global Trading Strategies Trust and Ibbotson Alpha Strategies Trust each use a separate Total Return Swap to deliver the returns of the hedge fund strategies to investors. A Total Return Swap is a derivative contract which provides economic returns linked to a Basket of Investments in return for the payment of an agreed cash flow. The Total Return Swap allows the relevant Trust to receive returns based on the performance of the underlying investments, but the Trust does not own those investments.

Currently, Macquarie is the counterparty for the Total Return Swaps. Under the Total Return Swaps, the counterparty is required to pay the relevant Trust an amount referenced to any increase in the value of the Basket of Investments and the Trust is required to pay the counterparty an amount referenced to any decrease in the value of the Basket of Investments plus certain costs (see 'Additional explanation of fees and costs' on page 28). The overall effect of the Total Return Swap is that the Trust derives the same return as if it had invested directly in the investments comprising the Basket of Investments after adjustment for costs.

The underlying investment of the Total Return Swap is a 'notional' Basket of investments, because neither the relevant Trust nor the counterparty is legally required to hold the Basket of Investments comprised in the Total Return Swap. The Responsible Entity can request changes to the composition of the Basket of Investments, the amount of the deposit and the amount of leverage. These changes can only be made with the consent of the counterparty. Each Total Return Swap will reference a different Basket of Investments. The counterparty, at its discretion, may or may not invest directly in the investments specified for the Basket of Investments. In practice, it may choose to invest in a similar portfolio to hedge its position under each Total Return Swap.

Payments under the Total Return Swap are made in Australian dollars. However, underlying investments in the Basket of Investments may be denominated in foreign currencies. Each Total Return Swap includes a mechanism which allows the Trust to hedge its exposure to the foreign currencies, so that it receives a return in Australian dollars.

If a distribution is paid by an underlying investment represented in the Basket of Investments, that amount will be reflected in the Basket of Investments. Any distributions from the relevant Trust will be decided separately. Refer to pages 36–37 for more information on how distributions are determined and paid.

Each Trust has the option to withdraw funds from the Basket of Investments, including if required to pay management costs (such as the Responsible Entity's fees) or to fund a redemption request. These costs may also be funded by increasing the leverage under the relevant Total Return Swap. Refer to pages 12 and 18 for more information on leverage and the associated risks.

Each Total Return Swap allows notional leverage, or borrowing, including to meet foreign exchange losses, up to a limit of 40% for the Ibbotson Global Trading Strategies Trust and 20% for the Ibbotson Alpha Strategies Trust of the face value of the Basket of Investments (subject to conditions set by the counterparty). As an example, for the Ibbotson Alpha Strategies Trust, a Basket of Investments valued at \$100 million, leverage may not be more than \$20 million. Leverage may be used in one of three ways (or as otherwise agreed with the counterparty):

- ▶ borrowing to invest more in the underlying investments in the Basket of Investments; or
- ▶ borrowing to meet short term liquidity needs of a Trust; or
- ▶ borrowing to meet foreign exchange losses arising within the Total Return Swaps.

The Trusts which invest via a Total Return Swap intend to only use leverage to meet short term liquidity and foreign exchange needs. These Trusts do not intend to use leverage to magnify the Trust's return.

Each Total Return Swap is valued regularly, taking into account factors including the most current valuations of the Basket of Investments, the level of outstanding leverage and currency hedges and the various allowances for costs under the Total Return Swap. Refer to page 42 for information on the valuation of the Trusts.

At the commencement of a Total Return Swap, the relevant Trust will deposit an amount with the counterparty equal to the initial face value of the Total Return Swap and an equivalent value of underlying investments is acquired by the counterparty and held by it or its custodian. The deposit is not Australian government guaranteed and each Trust is an unsecured creditor of the relevant counterparty. Each Trust may also make additional deposits from time-to-time if it wishes to increase the amount of the Total Return Swap. This deposit earns interest for the Trust which is set off against the payment obligations of the Trust under the Total Return Swap.

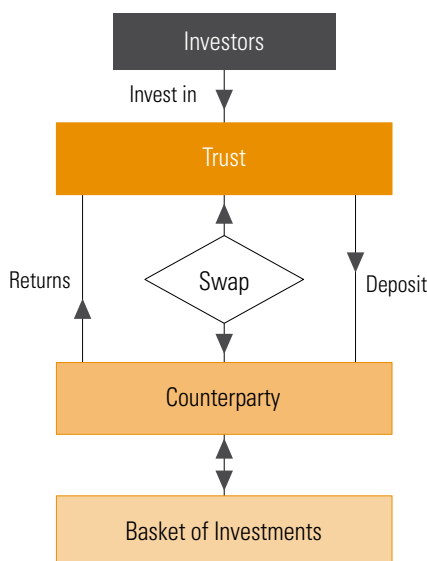

The Total Return Swaps each run for five years (expiring in September 2012 for the Ibbotson Global Trading Strategies Trust and March 2014 for the Ibbotson Alpha Strategies Trust). A Total Return Swap may be terminated early in the following circumstances: by agreement between the Responsible Entity and the counterparty; if certain events of default or termination events that are common early termination triggers in the derivatives market occur; by the counterparty if certain specified events which relate primarily to the Responsible Entity, the relevant Trust and the composition and performance of the underlying investments occur (including the failure to comply with any investment guidelines agreed between the Trust and the counterparty) and by the Responsible Entity for any reason. The Responsible Entity's early termination right is intended to give the Responsible Entity the flexibility to change the relevant Trust's investments if Ibbotson believes an alternate strategy will better achieve the Trust's objectives.

If there is an early termination of a Total Return Swap, the relevant trust may incur costs associated with early termination such as, the cost of closing out currency hedges, any specific termination fees and certain penalties for early redemption levied by the underlying investments specified in the Basket of Investments. There is no cross-collateralisation between the Total Return Swaps for each Trust.

The Responsible Entity intends entering into another total return swap at the end of the current term of each Total Return Swap. On the termination of a Total Return Swap, the counterparty will determine the amount which would be received on redemption of the Basket of Investments if it were directly held. If this amount (adjusted for any foreign exchange gain or loss), minus any leverage and minus the deposit is greater than zero, then the counterparty must pay the excess to the Trust. In addition, the deposit will be repaid to the Trust. If this amount (adjusted for any foreign exchange gain or loss), minus any leverage and minus the deposit is less than zero, then the Trust must pay the deficiency to the counterparty. To the extent that funds are available, this amount may be set off against the deposit, and the counterparty will only be required to repay the balance (if any) of the deposit.

Ibbotson and the Responsible Entity intend using the Total Return Swaps so long as this strategy facilitates the exposure to the desired underlying hedge fund strategies. However, each Trust may, in its absolute discretion, enter into other transactions similar to the Total Return Swap with other counterparties or change counterparties and choose to take advantage of additional direct holdings in investments.

Figure 3. Investment structure of the Total Return Swap

Investment risks and decision making

Your investment decision

Investment decisions are important and should reflect your particular circumstances. In making a decision it is important to consider the investment, its level of risk and diversification and how it relates to your investment goals and other investments you may hold. You should read all the information in this PDS carefully and seek appropriate professional advice before you make your decision.

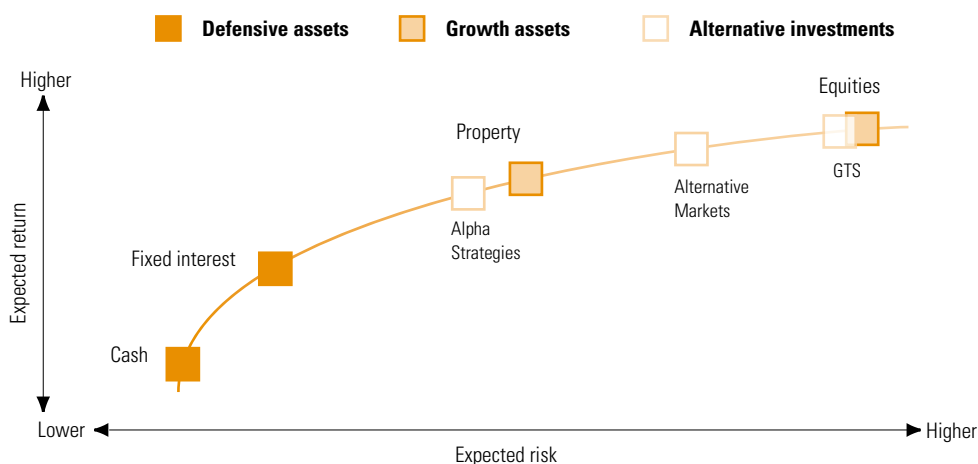

Considering your investment goals

To meet your investment goals an investment must fit comfortably with:

- ▶ your return expectations – this reflects the types of returns that you are seeking from an investment;
- ▶ your investment time horizon – which is based on the length of time you expect to hold an investment; and
- ▶ your risk tolerance – which refers to the extent of variation in the value of your investment, and returns (if any) from your investment, that you are willing to bear over the course of your investment time horizon.

If you are investing via an IDPS, your financial adviser will be able to assist you with determining your investment goals.

Figure 4. Investment risk and return

Understanding the risks

All investments have some level of risk. Risk is the likelihood of you not getting all your money back, and/or getting lower returns than expected. Investments with higher expected returns often involve higher risk.

The risk and return of traditional assets (classified as defensive and growth assets) and the Trusts are illustrated in figure 4 on page 14. Growth assets include equities and property, these assets carry higher levels of expected risk over the short term but have the potential for higher returns over the long term. Defensive assets include cash and fixed interest, these assets have lower levels of expected risk and investment return. However, in extraordinary market environments with extreme market volatility such as the global credit crisis, the expected risk and return profile may differ.

General risks

Market risk

The Trusts invest in investment markets and the performance of these markets will have an impact on returns. These markets are affected by a range of conditions (eg economic, technological or political) that impact returns. As the risk relates to the market as a whole it cannot be reduced by holding a greater variety of securities within that market.

Inflation risk

Increasing inflation reduces the purchasing power of assets or income. Changes in inflation may impact the value of your investments in the Trusts.

Interest rate risk

An increase in interest rates leads to a reduction in the value of a fixed interest investment, and vice versa. This risk is usually greater for fixed interest investments that have longer maturities.

Currency risk

Movements in exchange rates between the Australian dollar and foreign currencies can affect the performance of the Trusts with international investment exposure. Where foreign currencies fall in value relative to the Australian dollar this can have an adverse impact on investment returns for the Trusts holding international investments. Some of the Trusts may use currency hedging to reduce the magnitude of currency risk.

Contractual risk

In the interests of efficient investment, we may act on an investment application before confirmation that application monies have been received. If an investor were to fail to meet its contractual obligations to pay the application monies, this could result in a loss of capital to the relevant Trust, the risk of units not being issued to that investor or the subsequent cancellation of these units. An investor would be liable for any loss to their potential capital in the event of downward market movements before application monies have been received.

Changes in laws

The value of investments held by, or distributions from the Trusts may be affected by changes in laws such as taxation.

Country risk

Some of the Trusts invest in overseas securities. There is a risk that a country in which the Trusts invest may become politically or economically unstable which may prevent assets (such as shares) being sold or the proceeds being repatriated to Australia. This risk is generally higher in countries classified as emerging markets.

Trust risk

The following risks may apply when investing in the Trusts:

- ▶ characteristics such as distribution frequency may change;
- ▶ taxation laws are subject to continual change and may affect the tax implications of your investment;
- ▶ there may be different tax consequences for different investors compared to investing directly in the underlying investments due to income or capital gains accrued in the Trusts and the impact of withdrawal by other investors;
- ▶ unit pricing risk, meaning a risk of unit pricing errors which may result, for example, from system errors; and
- ▶ a Trust could be terminated.

Specific risks for the Ibbotson Global Trading Strategies Trust and Ibbotson Alpha Strategies Trust

Asset class risk

Hedge funds carry different kinds of risks than traditional asset classes arising from the use of leverage, short selling, discretion to invest in a wide range of investments and the power to introduce extra restrictions on redemptions. Risks include fraud, mispricing of assets and suspension of redemptions as well as the same risks as any active management strategy such as managers losing key investment professionals, deviating from their stated investment strategy or failing to apply their strategy successfully.

Alternative strategies are designed to generate returns that are not highly correlated with equity markets. However, these strategies are susceptible to extreme market conditions such as reduced liquidity in markets and suspension of short selling. These investment strategies may become less effective or even fail.

These risks are managed through diversification, due diligence and ongoing monitoring.

Manager risk

There is a risk that the investment managers selected may fail to meet their investment objectives resulting in sub-standard returns for the Trusts. For example, this may be brought about by a change of employees at a particular investment manager which may affect the future performance of the Trusts.

Derivatives risk

Derivatives (such as swaps, options, futures, forward rate agreements and forward foreign exchange contracts) are used to manage risk or to gain exposure to individual securities, currencies and investment markets.

The Ibbotson Global Trading Strategies Trust and Ibbotson Alpha Strategies Trust invest directly in the Total Return Swaps, which incorporate forward exchange contracts. The underlying investments in the Basket of Investments held by the Total Return Swap may use derivatives as part of their trading strategies.

Risks associated with using derivatives include the value of the derivative failing to move in line with the underlying asset, potential illiquidity of the derivative and counterparty risk. Refer to 'Counterparty or credit risks' for risks which are specific to the Total Return Swaps and 'Currency risk' on page 15 and 'Liquidity risk' on page 18. Further information can be found in Ibbotson's Derivative Risk Statement.

Counterparty or credit risk

Counterparty or credit risk is the risk that a counterparty to the Total Return Swaps within the Ibbotson Global Trading Strategies Trust and Ibbotson Alpha Strategies Trust, fails to meet its contractual obligations resulting in a loss of some or all of the funds deposited with the counterparty. The funds deposited with the counterparty are not secured nor subject to the Australian government guarantee, and each Trust is an unsecured creditor of the relevant counterparty.

To mitigate this risk, the relevant Trust only contracts with counterparties which comply with minimum credit rating standards contained in Ibbotson's Derivatives Risk Statement. In accordance with Ibbotson's Derivative Risk Statement, the credit policy requires that at the time of executing agreements the counterparty must have a credit rating of 'A' or the equivalent or better, as rated by approved ratings agency (i.e. either Standard & Poors, Moodys or Fitch), or be guaranteed by a 'A' rated entity. If after the agreements are executed the counterparty is downgraded to 'A-', the counterparty will be reviewed on an ongoing basis or if the counterparty is downgraded below 'A-', the counterparty will be replaced within a reasonable time subject to a maximum of 180 days of the downgrade.

Concentration risk

An additional risk of concentration of assets arises if the same party were to be the counterparty to the Total Return Swaps for both Ibbotson Global Trading Strategies Trust and the Ibbotson Alpha Strategies Trust. At the date of issue of this PDS, Ibbotson Global Trading Strategies Trust and the Ibbotson Alpha Strategies Trust have the same counterparty, Macquarie, for their Total Return Swaps. Ibbotson monitors the counterparty on an ongoing basis in light of the concentration risk.

Total Return Swap termination risk

There is a risk that when the Total Return Swaps for the Ibbotson Global Trading Strategies Trust and Ibbotson Alpha Strategies Trust terminate, whether on maturity or earlier for any reason, that the relevant swaps may not be able to be renewed or an equivalent arrangement on terms similar to those currently applicable can not be made.

A Trust may incur early termination costs. Costs of early termination include the costs associated with closing out currency hedges and may include penalties for early redemptions imposed by the underlying investments specified in the Basket of Investments.

At termination, if the Basket of Investments includes underlying investments with long redemption periods (i.e. more than 12 months) it may take some time to determine the final valuation of the amounts owing under the Total Return Swaps.

Liquidity risk

The Ibbotson Global Trading Strategies Trust and Ibbotson Alpha Strategies Trust are exposed to investments which offer limited liquidity, in terms of a minimum initial investment period ('lock up'), monthly, quarterly or even annual opportunities to invest and redeem, notice periods for redeeming funds and deferred payment of redemptions. Please note the following important restrictions:

- ▶ A 12 month lock-up period will apply to all monies you invest in the Ibbotson Global Trading Strategies Trust and the Ibbotson Alpha Strategies Trust, from the date you purchase each unit. This means that you will not be able to redeem during the first 12 months for each unit you purchase.
- ▶ After the lock-up period, we require three months notification for funds to be redeemed from the Ibbotson Alpha Strategies Trust and one month for funds to be redeemed from the Ibbotson Global Trading Strategies Trust.
- ▶ In addition to the 12 month lock-up period, the payment of units you redeem may be deferred depending on the liquidity of the underlying investments in the Basket of Investments.

Leverage risk

Ibbotson Global Trading Strategies Trust and the Ibbotson Alpha Strategies Trust are permitted to borrow under their respective Constitutions and use borrowing (or leverage) to manage liquidity and foreign exchange of the Trusts. Leverage may also be used by the underlying investments specified in the Basket of Investments to magnify returns. Underlying investments may be leveraged by more than 100%. Leverage magnifies returns (both positive and negative). However investors in the Trusts do not have a contingent liability and will not be required to contribute additional funds in the event that underlying levered investments generate a loss.

Rises in interest rates may result in an increase in the cost of leverage which would be paid from the assets of the Trust.

Performance fee risk

Any performance fees payable are paid by unitholders and not by the Trusts. A sufficient number of a unitholder's units in the relevant Trust are redeemed to fund payment of the performance fee rather than it being deducted from the Trust's assets. This redemption process means you only incur performance fees specifically identifiable to your investment. Please note, however, you will not be given the opportunity to directly pay for any performance fees in the ordinary course of business (i.e. unitholders are not directly invoiced for payment of the performance fees) and redemptions may crystallise a capital gains liability for you.

Level of distribution risk

Due to the nature of the investment strategies of the Ibbotson Global Trading Strategies Trust and Ibbotson Alpha Strategies Trust, you should not expect to receive distributions from the Trusts during the term of the Total Return Swap. Amounts will only be distributed if net income is derived by the Trust. Where distributions are paid, your distribution will be automatically reinvested in additional units.

Taxation risk

During the term of each Total Return Swap, the Ibbotson Global Trading Strategies Trust and Ibbotson Alpha Strategies Trust are expected to make payments to Macquarie, the counterparty, and incur expenses such as management fees. The gain (if any) on the Total Return Swaps would generally not be assessable for tax purposes until the year in which each Total Return Swap terminates (ignoring any partial realisations of the Total Return Swap). The Trusts may make tax losses during the term of the Total Return Swaps.

As the Ibbotson Global Trading Strategies Trust and Ibbotson Alpha Strategies Trust are open ended, there is a possibility of a 50% or more change in the ownership of these Trusts occurring on one or more occasions as new unitholders invest in the Trusts. This combination of events means there is a risk that the Trust's tax losses may be denied under income tax law. This may result in the taxable income returned to unitholders exceeding the economic gains derived by the Trusts over the life of the Total Return Swap. However, any excess in this regard should result in a lower gain or higher loss to unitholders on redemption of their units in the Trusts.

Specific risks for the Ibbotson Alternative Markets Trust

Asset class risk

Investment in listed infrastructure and commodities carry specific risks.

Specific risks associated with listed infrastructure include the same risks that apply to investment in listed share markets such as failure of the underlying companies to generate profits, inability to fund the business due to excessive leverage and falls in share prices due to changes in investor expectations of future profits.

Specific risks associated with commodities include the demand and supply for natural resources, underlying economic factors, foreign exchange risk and inflation.

These risks are managed through investment in listed securities obtaining diversified exposure to infrastructure and commodities and ongoing due diligence and monitoring of managers.

Manager risk

There is a risk that the investment managers selected may fail to meet their investment objectives resulting in sub-standard returns for the Trusts. For example, this may be brought about by a change of employees at a particular investment manager which may affect the future performance of the Trust.

Derivatives risk

Derivatives (such as swaps, options, futures, forward rate agreements and forward foreign exchange contracts) are used to manage risk or to gain exposure to individual securities, currencies and investment markets.

The Ibbotson Alternative Markets Trust may be exposed to derivatives indirectly via the underlying investments.

Further information can be found in Ibbotson's Derivative Risk Statement.

Fees and other costs

Did you know?

Small differences in both investment performance and fees and costs can have a substantial impact on your long-term returns.

For example, total annual fees and costs of 2% of your Trust balance rather than 1% could reduce your final return by up to 20% over a 30 year period (for example, reduce it from \$100,000 to \$80,000).

You should consider whether features such as superior investment performance or the provision of better member services justify higher fees and costs.

You may be able to negotiate to pay lower contribution fees and management costs where applicable. Ask us or your financial adviser.

To find out more

If you would like to find out more, or see the impact of the fees based on your own circumstances, the Australian Securities and Investments Commission (ASIC) website (www.fido.asic.gov.au) has a managed investment fee calculator to help you check out different fee options.

This section shows fees and other costs that you may be charged. These fees and costs may be deducted from your money, from the returns on your investment or from the Trust assets as a whole. Taxation details are set out in the taxation section of this PDS starting on page 30.

You should read all the information about fees and costs as it is important to understand their impact on your investment. Fees and costs for each Trust are set out on page 22.

Fees and other costs

Type of fee or cost	Ibbotson Global Trading Strategies Trust	Ibbotson Alpha Strategies Trust	Ibbotson Alternative Markets Trust	How and when paid
Fees when your money moves in or out of a Trust¹				
Establishment fee: The fee to open your investment.	Nil	Nil	Nil	Not applicable
Contribution fee: The fee on each amount contributed to your investment.	Nil	Nil	Nil	Not applicable
Withdrawal fee: The fee on each amount you take out of your investment.	Nil	Nil	Nil	Not applicable
Termination fee: The fee to close your investment.	Nil	Nil	Nil	Not applicable
Management costs^{2,3} The fees and costs for managing your investment.				
Management fees	1.23% pa of the net asset value of the Trust	1.23% pa of the net asset value of the Trust	0.92% pa of the net asset value of the Trust	The management fee includes the fees payable for managing the Trust as well as the running expenses of the Trusts (but does not include abnormal expenses). The management fee is deducted from the assets of each class of unit in the Trust and is reflected in the unit price. For the Ibbotson Global Trading Strategies Trust and Ibbotson Alpha Strategies Trust, the management fees are accrued monthly and paid monthly in arrears. For the Ibbotson Alternative Markets Trust, the management fees are accrued daily and paid monthly. The amount of the management fee can be negotiated, at our discretion ⁴ .
Abnormal expenses	Estimated to be 0.00% pa to 0.10% pa of the net asset value of the Trust	Estimated to be 0.00% pa to 0.10% pa of the net asset value of the Trust	Estimated to be 0.00% pa of the net asset value of the Trust	Accrued in the unit price of the trust when incurred and paid out of the assets of the Trusts.

Notes

- You may also incur a buy-sell spread when your money moves into or out of the Trust. An explanation of the buy/sell spread is found in 'Additional explanation of fees and costs' on pages 27–28.
- Management costs are inclusive of Goods and Services Tax (GST) after taking into account any expected reduced input tax credits (RITC). Management costs are rounded to two decimal places, but in practice the rates are calculated and applied at more than two decimal places.
- We may pay some IDPS operators an annual product access payment for offering the Trusts on their menus. The product access payment is not an additional fee paid by investors, but instead is treated as a running expense and therefore deducted from the management fee for the Trust. It does not reduce any returns an investor may receive.
- Please refer to 'Management fees' in the 'Additional explanation of fees and costs' section for more information.

Type of fee or cost	Ibbotson Global Trading Strategies Trust	Ibbotson Alpha Strategies Trust	Ibbotson Alternative Markets Trust	How and when paid
Management costs (continued)				
Performance fee ^{5,6,7}	10.25% pa of the return above the benchmark index for the Trust net of our management fee subject to certain conditions being met.	10.25% pa of the return above the benchmark index for the Trust net of our management fee subject to certain conditions being met.	0.00% pa	Where payable, performance fees are paid by redeeming a sufficient number of a unitholder's units in the Trust. The amount of the performance fee can be negotiated, at our discretion.
Service fees				
Investment switching fee: The fee for changing investment options	Nil	Nil	Nil	Not applicable

Notes

5 The Ibbotson Alternative Markets Trust does not currently charge a performance fee but is permitted to do so under the Constitution. Performance fees are inclusive of GST after taking into account any expected RITC. Performance fees are rounded to two decimal places, but in practice the rates are calculated and applied at more than two decimal places.

6 For a worked dollar example of the performance fees, see 'Example of annual fees and costs' on page 24.

7 Refer to 'Performance fees' in the 'Additional explanation of fees and costs' on page 26.

Example of annual fees and costs

This table gives an example of how the fees and costs for the Ibbotson Global Trading Strategies Trust, can affect your investment over a one year period. You should use this table to compare this product with other managed investment products.

e.g. Ibbotson Global trading Strategies Trust		Balance of \$500,000 with a contribution of \$5,000 at the beginning of the year ¹
Contribution fee	Nil	For the \$5,000 you put in at the beginning of the year, you will be charged \$0.
PLUS Management costs	1.23% pa	And, for every \$500,000 you have in the Trust you will be charged a management fee each year of: \$6,150 ² pa
PLUS Performance fees	0.41% pa	And, assuming the Trust's return is 9% and the UBS Australian Bank Bill Rate return is 5% (and there is no previous negative performance fee accrual to be made up), for every \$500,000 you have in the Trust you will be charged: Performance fee % multiplied by the difference between the Trust value and the benchmark value at the end of the period $10.25\% \times ((\$500,000 \times 1.09) - (\$500,000 \times 1.05))$ $10.25\% \times \$20,000$ \$2,050 ^{3,4} pa
EQUALS Cost of Trust	1.64% pa	If you invest \$5,000 at the beginning of the year and your balance is \$500,000 over the course of the year, then for that year you would be charged fees of: \$8,200 ⁵ pa

What it actually costs you will also depend on the Trust you choose and on the management fees you negotiate with us.

Notes

1. This example is based on an investment balance of \$500,000 as this is the minimum amount accepted in the Trusts.
2. Management costs are rounded to two decimal places in this PDS, but in practice the rates are calculated and applied at more than two decimal places.
3. Management costs are calculated on an Indirect Cost Ratio basis and include all direct and indirect management costs that are not deducted directly from your account. Please note however, management costs do not include (i) the effect of any transaction costs which may be incurred by the Trust (ii) the impact of any underlying investment manager fees that may be deducted from the proceeds earned under the Total Return Swaps (iii) costs associated with accessing the Basket of Investments via the Total Return Swap, as these fees and costs are not considered 'management costs' for the purposes of the Corporations Act. Refer to 'Management costs' in the table on page 22 and the section 'Additional explanation of fees and costs' on page 25 for a more detailed description of what comprises management costs and how they are calculated.
4. Refer to 'Performance fee' in the table on page 23 and the section 'Additional explanation of fees and costs' on page 26 for more information on how performance fees are calculated. Please note, the fact that the example assumes a rate of return of 9% pa (i.e. 4% above the Trust's benchmark) is not in any way intended to be a forecast of the likely returns the benchmark or the Trust might achieve. Returns are not guaranteed.
5. This example assumes your balance remains constant at \$500,000 throughout the year (i.e. no further contributions are made and the Trust's unit price does not change) and the fees are not individually negotiated with Ibbotson on behalf of the Responsible Entity. The example does not include abnormal expenses which may be incurred by the Trusts.

Additional explanation of fees and costs

Management costs

Management costs are the fees and costs for managing your investment and include all direct and indirect costs for managing the Trusts. Where a Trust invests in an underlying Trust managed by Ibbotson the management fee and performance fee (if applicable) will only be charged once on the invested amount.

You do not incur a management fee and performance fee (if applicable) in both the Trust and any underlying Ibbotson trust.

Management costs are rounded to two decimal places in the table on page 22, but in practice the rates are calculated and applied at more than two decimal places.

Management costs include:

Management fees

The management fees are accrued in the unit prices and paid out of the assets of the Trusts.

For the Ibbotson Global Trading Strategies Trust and Ibbotson Alpha Strategies Trust, the management fees are accrued monthly and paid monthly in arrears.

For the Ibbotson Alternative Markets Trust, the management fees are accrued daily and paid monthly.

Each Trust's Constitution allows the management fee to be charged in other ways negotiated with you, for example by invoicing you directly.

The maximum management fee allowable under the Constitution of each Trust is 4% pa of the operational net asset value of the Trust.

For wholesale clients, in line with ASIC Class Order 03/217 (as amended from time to time), we may:

- ▶ charge a lower management fee than those currently specified in the table on page 22; or
- ▶ rebate a part of the management fee.

Ibbotson allows staff to invest at management fees concessional to the standard offer. All staff are subject to internal human resource policies and procedures governing the staff investment program.

For more information about if and when you can negotiate the management fee, please contact (02) 9276 4550.

The management fee includes fees payable to us for administering the Trust as well as running expenses of the Trust (it does not include abnormal expenses). Please refer to pages 26–27 for additional information on running expenses and abnormal expenses of the Trust. Where the Trust(s) invests directly with underlying managers through a managed investment scheme or investment mandate, we pay the underlying managers' management fees (excluding performance fees and running costs of the underlying managers) out of our management fee payable.

For the Ibbotson Global Trading Strategies Trust and Ibbotson Alpha Strategies Trust, the management fee does not include:

- ▶ any management or performance fees charged by any underlying investment managers represented within the Basket of Investments accessed via the Total Return Swaps (as these costs are not deducted from a 'common fund' for the purposes of the Corporations Act and correspond to amounts that would be paid if you invested directly with the managers themselves); or
- ▶ costs associated with accessing the Basket of Investments via the Total Return Swaps (as the cost of entering into the Total Return Swap is a transaction cost of the Trust).

Performance fees

In addition to the management fee, we are entitled to receive a separate performance fee, currently 10.25% pa, based on the outperformance of the Ibbotson Global Trading Strategies Trust and the Ibbotson Alpha Strategies Trust relative to its benchmark, which is currently the UBS Australian Bank Bill Rate.

The rate of this fee may be varied, or the relevant benchmark, from time to time so long as the fee is within the maximum permitted by the Constitution, which is 25% pa of the outperformance of the relevant Trust.

The performance fee is not accrued in the unit price of the relevant Trusts. Where payable, the performance fee is paid by redeeming a sufficient number of a unitholder's units in the relevant Trust.

For the Ibbotson Global Trading Strategies Trust, the performance fee is calculated monthly and paid monthly in arrears provided the unit price at the end of each month is not less than the unit price at the end of the preceding month after adding back any distributions for that month.

For the Ibbotson Alpha Strategies Trust, the performance fee is calculated monthly and paid quarterly in arrears provided the unit price at the end of each quarter is not less than the unit price at the end of the preceding quarter after adding back any distributions for that quarter.

At the end of a calculation period, if the performance accrual is negative, no fee is payable and a negative fee accrual will be carried forward to the start of the next calculation period. Any future performance fee accrual will only be paid when the total performance fee accrual is positive.

When a unitholder redeems in full before the end of a calculation period, their performance fee accrued to date will be calculated and paid through the redemption of units prior to redeeming the full balance of units.

The Ibbotson Alternative Markets Trust does not currently charge a performance fee but is permitted to do so under the Trust's Constitution. The Responsible Entity reserves the right to do so in the future.

Running expenses

The Responsible Entity is entitled to be reimbursed from the Trusts for all expenses (as authorised by each Constitution) incurred in managing and administering the Trusts. Under each Constitution, there is no specific limit on the level of expense recovery from Trust assets. Running expenses are all expenses incurred in managing and administering the Trusts, other than fees paid to investment managers, abnormal expenses and transactions costs of the kind used to determine the buy/sell spreads. Currently, running expenses such as custody, taxation or legal advice and audit costs are paid out of the management fee. These running expenses are not an additional cost to you.

Abnormal expenses

Abnormal expenses are additional Trust expenses that may arise from time to time in relation to the Trusts, such as costs incurred in changing counterparties, litigation, convening a meeting for unitholders or winding up a Trust.

Abnormal expenses may be recovered from the assets of the Trusts and are not payable by us from the management fee. If incurred, they are accrued if and when they are able to be estimated and are reflected in the unit price at that time (see page 42 for more information about unit prices). These costs are incurred infrequently.

For a worked dollar example of management costs, including the impact of performance fees, refer to the example of annual fees and costs for the Ibbotson Global Trading Strategies Trust on page 24.

Transaction and operational costs

Transaction costs

Transaction costs are those costs and expenses incurred in the acquisition or disposal of assets of the Trusts. Transaction costs for the Ibbotson Global Trading Strategies Trust and the Alpha Strategies Trust include buy/sell spreads of the investments within the Basket of Investments, brokerage, the ongoing cost of the Total Return Swap (refer 'Total Return Swap costs' on page 28), lock up penalties, duties and taxes and reflect the costs that would ordinarily be incurred by an investor who invested directly in these assets. Transaction costs are normally incurred directly by the Trusts, but where they are incurred by Ibbotson or the Responsible Entity on behalf of the Trusts, that party will be reimbursed from the Trusts.

Buy/sell spreads

The difference between the entry price and exit price of a unit is called the 'buy/sell spread'. This covers the estimated transaction costs of buying or selling investments when you apply, switch units or redeem from a Trust. The buy spread is added to the price payable on application for units, and the sell spread is deducted from the amount payable to you when you redeem units. Each is expressed as a percentage of the unit price. Buy/sell spreads help achieve equity by spreading costs between investors entering and exiting the Trust.

The buy/sell spread is retained in the relevant Trust to cover these transaction costs. The buy/sell spread applicable to each Trust is shown below.

	Buy/sell spread ¹	Dollar example of buy/sell spread included in unit price based on a \$500,000 investment/withdrawal ²
Ibbotson Global Trading Strategies Trust	0.18% / 0.18%	\$900 / \$900
Ibbotson Alpha Strategies Trust	0.26% / 0.26%	\$1,300 / \$1,300
Ibbotson Alternative Markets Trust	0.28% / 0.28%	\$1,400 / \$1,400

Notes

¹ The buy/sell spreads are current as at the date of this PDS. For up to date buy/sell spreads, please contact us.

² The dollar example is based on the assumption that the unit price (before the estimate for transaction costs) is \$1.00 when you invest \$500,000 in each Trust and that the unit price (before the estimate for transaction costs) is \$1.00 when you withdraw from each Trust.

Certain investments for the Ibbotson Global Trading Strategies Trust and the Ibbotson Alpha Strategies Trust in the Basket of Investments of the Total Return Swap may apply a lock-up period and accordingly a penalty fee may apply for redeeming within that lock-up period. The sell spread may not be sufficient to cover transaction costs if the relevant Trust incurs a penalty fee for redeeming within an underlying manager's lock-up period. To ensure that all unitholders are treated equally and are not disadvantaged, redemptions may be subject to a calculated sell spread larger than that shown in the table on page 27. The difference between the standard and calculated spread will, in dollar terms, equal the lock-up penalty fee charged by the underlying manager and will be included in the Total Return Swap.

Spreads may change without notice, for example if transaction costs change. A policy is in place which sets out the guidelines and relevant factors for calculating unit pricing, including buy and sell spreads.

You may obtain a copy of the policy (and any records ASIC requires to be maintained) free of charge by contacting us.

Total Return Swap costs for the Ibbotson Global Trading Strategies Trust and the Ibbotson Alpha Strategies Trust

The costs of each Total Return Swap include:

- ▶ the Total Return Swap fees;
- ▶ the cost of leverage;
- ▶ administration costs (including any penalties as described under 'Transaction costs' and 'Buy/sell spreads' on page 27); and
- ▶ transaction expenses such as brokerage.

Macquarie, the counterparty will pay interest on the deposit. In respect of the equivalent amount of the Basket of Investments, the relevant Trust will pay the counterparty a fee at a rate equal to the sum of the above rate plus a negotiated margin. The net effect of this will be that, in respect of an amount equal to the deposit, the Trust will pay the counterparty a rate equal to the negotiated margin.

In respect of any leverage used, the relevant Trust will pay the counterparty a fee at a rate equal to the sum of an interbank reference rate plus a negotiated margin.

Underlying investment manager fees are deducted from returns and distributions of the underlying investments before any returns are credited to the Basket of Investments.

The costs of each Total Return Swap are not included in our management fees.

Commission

Where we pay commissions to third parties such as dealer groups, IDPS operators or other licensees for offering the Trusts on their investment menus or for the provision of services, any such payments would not impact the returns you may receive.

Ibbotson maintains an Alternate Forms of Remuneration Register. The registers, which you can review by contacting us, outline some alternative forms of remuneration that may be paid to or received from licensees, fund managers or representatives (if any is paid or received in relation to the Trusts).

Change in fees and costs

The Trusts' fees and costs may change within limits allowed by each Constitution. The Responsible Entity reserves the right to change fees and costs without unitholders' consent. Unitholders will be notified of any increases in the fees and costs at least 30 days before implementing them. If the Trusts ever sought to charge fees above the maximums permitted in each Constitution, unitholder consent would be sought.

GST

Fees and costs charged to the Trusts generally attract 10% GST which is charged to and borne by the Trusts. All fees and costs disclosed in this PDS are inclusive of GST, to the extent applicable, after taking into account any expected Reduced Input Tax Credits (RITCs). The Trusts will claim RITCs where possible under the GST regulations. These credits will reduce the overall cost of GST to the Trusts and will be reflected in the unit price. The term "net GST" is the net cost after taking into account GST and RITCs.

Switching fee

A switch between Trusts is treated as a redemption from one Trust and an application for units in another Trust. The Trusts do not presently charge a switching fee (or an entry or exit fee on the amount of the switch). The Trusts' buy/sell spreads will apply to switches.

Taxation

The following is a brief outline of the Australian taxation consequences of investing in the Trusts.

Because the Australian taxation laws are complex and different investors have different circumstances, it is recommended that you seek professional taxation advice in relation to investing in the Trusts and the tax consequences of any distributions you receive. Please be aware that not all the following statements will apply to all investors. In particular, New Zealand residents should obtain their own taxation advice.

This section of the PDS is intended as a general guide only, and is based on Australian taxation laws that were current as at the date of this PDS. These laws, and the interpretation and administration of them, may alter over time.

The Trusts are established as separate unit trusts. The effect of tax on the Trusts, and hence your investment in the Trusts, can vary depending on such factors as the type of investment, the timing of investment transactions, and entry and exit of other unitholders in the relevant Trust.

Distributions

Each Trust is a resident of Australia for tax purposes; therefore, each Trust is required to determine its net income (taxable income) for the year of income. It is intended that investors will be presently entitled to all of the net income of each Trust (including net taxable capital gains) for each income year, such that pursuant to the existing income tax legislation, each Trust should not be subject to Australian income tax. In the case where a Trust makes a loss for tax purposes, the Trust cannot distribute the loss to investors. However, subject to the Trust meeting certain conditions, the Trust may be able to take into account the losses in subsequent years.

Due to the nature of the Ibbotson Global Trading Strategies Trust and Ibbotson Alpha Strategies Trust investment strategies, distributions are not expected during the term of the Total Return Swap (except where net realised gains are earned on a partial realisation of a Total Return Swap in which case a distribution might be paid). Such gains would be treated as ordinary income rather than capital gains and would therefore not be eligible for the CGT discount concession. If a distribution is made it will automatically be reinvested in additional units.

The distributions you receive from the Ibbotson Alternative Markets Trust may include a number of different types of income which reflect the income derived by the Trust. These components may include:

- ▶ capital gains;
- ▶ foreign income and foreign tax credits;
- ▶ franked dividends/imputation credits; and
- ▶ tax deferred distributions.

Provided that all income is distributed to unitholders in relation to the year it is earned, the Trusts will not pay Australian income tax under current tax law. An Australian investor's share of the net income of the Trusts for a year of income, including amounts received in a subsequent year or which are reinvested, forms part of the investor's assessable income of that year.

You will be provided with a statement for tax purposes after 30 June each year to assist you (and your adviser) in determining your tax position. This tax statement will advise you of the distribution amounts (if any) to

include in your tax return as assessable income, capital gains, any franked dividends/franking credits and any foreign income/foreign income tax offsets.

In addition, the statement will advise you of the tax-deferred portion (if any) of the distribution i.e. those amounts that have been distributed to you but are not included in your taxable income. Such amounts will generally, reduce your cost base in the units in the relevant Trust. Should your cost base be reduced below zero after one or more cumulative tax-deferred distributions, the amounts in excess of your cost base should be a capital gain that should be included in your taxable income. You may be entitled to the CGT discount in respect of this gain (see below).

Redemptions

If you redeem units you will need to include any capital gains or losses you have made in the calculation of your net capital gain or loss for the income year assuming you hold the units in the Trust(s) on capital account (unless you are a non-resident investor that may not be liable for Australian CGT – see ‘Non-resident investors’ on pages 32–33).

Depending on the type of entity you are, you may be entitled to a CGT discount (of 50% for trusts and individuals or 33.3% for superannuation funds) on any net capital gain if you have held your units in the Trust for at least 12 months from the date of acquisition. Companies are not entitled to CGT discounts on their capital gains, including discount capital gains distributed by a Trust.

On redemption of units, you may receive both capital proceeds and an income component representing your share of the undistributed income for the year up to the redemption date. Refer ‘Distributions’ on page 30 for more information. In addition, we may choose to allocate any gains arising from the realisation of assets to fund your redemption to you. Any such income distributions should be included in your assessable income in the year you are presently entitled to that distribution.

If a performance fee is payable by you, we will redeem a number of units on your behalf to pay the performance fee. The redemption will constitute a disposal of those units for tax purposes. Unitholders should consult their taxation advisers regarding the deductibility of the performance fee to them in light of their own particular circumstances.

Franked distributions/franking credits

Distributions from the Ibbotson Alternative Markets Trust may include franked distributions and related franking credits. A tax offset for the credits may be available in calculating an investor’s tax liability, depending on their specific circumstances (subject to various anti-avoidance rules including the holding period rule). Excess franking credits may be refundable to resident individuals and complying superannuation entities, and in certain cases may generate tax losses for corporate entities.

Foreign income and foreign income tax offsets

Due to the nature of the Ibbotson Global Trading Strategies and the Ibbotson Alpha Strategies Trust investment strategies, we do not expect the Trust to pay foreign tax.

Where foreign tax has been paid by the Ibbotson Alternative Markets Trust in respect of foreign income, resident unitholders may be able to claim a tax offset for their share of the tax paid. We will advise each investor of their share of such foreign income tax offsets.

The Trusts may directly or indirectly hold interests in Controlled Foreign Companies (CFC) at the end of a financial year. Under the CFC regime, resident investors may be assessed on their portion of the CFC's attributable income for the financial year, even if income is not distributed.

The Trusts may also hold interests in Foreign Investment Funds (FIF) at the end of the financial year. Under the FIF regime, you may be assessed on FIF attributable income for the financial year, even though income is not distributed by the FIF. The Trusts may be exempt from taxation under the FIF regime if any of the specified exemptions apply in respect of that FIF interest. The range of exemptions is varied. Examples include situations where the FIF carries on an active business, where the interest is certain US entities and where the value of the Trust's FIF interests in respect of which income is attributable is less than 10% of the value of all its FIF interests.

The Australian Government recently released exposure draft legislation on 18 December 2009 that provides for the repeal of the current FIF regime in its entirety and replacing it with a narrower anti-deferral regime. The exposure draft does not contain information regarding from which income year the proposed amendments will apply.

Non-resident investors

Tax may be withheld from that part of distributions made to non-resident investors that have an Australian source. The rate of withholding tax will depend on the type of income and the country of tax residence of the investor, and any governing international tax treaty.

In the absence of a governing treaty, tax of 10% will be withheld on interest income, and tax of 30% will be withheld on unfranked dividends. No withholding tax is applicable to fully franked dividends.

The withholding tax rate generally applicable for residents of information exchange countries in respect of any remaining Australian sourced income should be as follows:

- ▶ 22.5% in the income year ended 30 June 2009
- ▶ 15% in the income year ended 30 June 2010
- ▶ 7.5% in the income years ending 30 June 2011 onwards.

The withholding tax rate applicable for residents of all other countries is 30%.

In most cases, these withholding taxes are each a final tax. As a result, the non-resident investors should not be liable to further Australian tax on income from which withholding tax has been withheld.

The withholding tax rates outlined above will apply if the Trusts continue to qualify as Managed Investment Trusts (MITs) for tax purposes. Different rates will apply if the Trusts do not qualify as MITs.

Foreign sourced income to which a non-resident is presently entitled should not be subject to tax in Australia.

Any capital gains distributed by the Trust will only be taxable to non-resident investors to the extent that the capital gain was in respect of taxable Australian property (i.e. typically Australian real property or shares or

units in an entity whose majority underlying value is derived from taxable Australian property based on current market values of the entities assets). The statement provided to you after 30 June each year will disclose the extent to which a distributed capital gain is in respect of taxable Australian property.

Legislation has recently been introduced into Parliament to allow eligible MITs to make an irrevocable election to apply a deemed capital account treatment for gains and losses on disposal of certain investments (including shares and units in other trusts, but excluding derivatives and foreign exchange contracts). Subject to meeting the eligibility requirements to be a MIT, where applicable the Trusts intend on making the election to be on capital account.

Under the CGT provisions of the Australian income tax legislation, the disposal of units, either by redeeming, switching or transferring units, may lead to a CGT liability. Investors who are non-residents of Australia for income tax purposes (and do not have an Australian permanent establishment) will generally only be subject to Australian CGT on the disposal of their units if their units are taxable Australian property. If you are not a resident of Australia, your units are generally taxable Australian property if:

- ▶ the units were capital assets held in carrying on business through a permanent establishment in Australia; or
- ▶ both the following conditions are satisfied:
 - (i) you and your associates hold 10% or more of the units in a Trust at either the time you dispose of your units or throughout a 12 month period that began no later than 24 months before that disposal time; and
 - (ii) more than 50% (by market value) of the Trust's assets comprised (directly or indirectly) of interests in taxable Australian real property.

However, based on the current investments and investment approach of the Trusts it is not expected that the second condition would be satisfied.

It is strongly recommended that non-resident investors obtain their own tax advice when disposing of units in the Trusts. It should also be noted that you may be subject to the tax laws in your country and should consult a taxation adviser before investing.

Closely held trusts

The Trusts may be closely held trusts. If so, this means that we will need to provide the Australian Taxation Office (ATO) with details of each unitholder's status. Under the Constitution, the Responsible Entity is entitled to be indemnified for any such loss or cost to the Trust or tax required to be withheld and remitted by the Trust to the ATO if that results from a unitholder omitting to give us the relevant information.

Tax File Numbers (TFN) and Australian Business Numbers (ABN)

It is not compulsory for you to quote your TFN or ABN. If you are making this investment in the course of a business or enterprise that you carry on, you may quote an ABN instead of a TFN. Failure by you to quote an ABN or TFN or claim an exemption may cause the Trusts to withhold tax at the top marginal rate plus the Medicare Levy, on gross payments including distributions of income to you. By quoting your TFN or ABN it

will be applied to all your investments with the Trusts. If you do not want to quote your TFN or ABN for some investments, please let us know.

Taxation of Financial Arrangements – tax reform

The Tax Laws Amendment (Taxation of Financial Arrangements) Bill 2008 (known as TOFA) was granted Royal Assent on 26 March 2009.

The Trusts will opt into the TOFA regime from 1 July 2010. The impact of the TOFA regime is not expected to materially change the taxation consequences of income flowing from the Trusts.

GST

The issue, redemption or transfer of units in the Trusts will not attract GST under the current GST law. Investors should seek independent advice in relation to the GST consequences of their investment.

How the Trusts work

Constitutions

The Trusts are each governed by a separate Constitution, as amended from time to time. Each Constitution sets out the Responsible Entity's obligations as well as the rights of unitholders. Some key aspects of the Constitutions have been summarised in this PDS.

The Responsible Entity may alter each Constitution as specified in the Constitutions and in accordance with the law. The *Corporations Act 2001* specifies that the consent of unitholders (given at a meeting convened and conducted in accordance with the *Corporations Act 2001*) is required for any alteration unless the Responsible Entity reasonably believe that the alteration will not adversely affect the rights of unitholders.

You may view a copy of the Constitutions at our offices on any Business Day or you may obtain a copy free of charge by contacting us.

Compliance plan

The Responsible Entity has established a compliance plan for each Trust, which sets out the measures to be applied in operating each Trust to ensure compliance with its Constitution and the law. The Responsible Entity's Board of Directors is responsible for overseeing the compliance plans.

Classes of units

Under each Constitution, units may be issued in one or more classes and additional classes of units may be created at any time. All units in a class will have identical interests and rights and will be subject to identical conditions. Where a Trust issues units of different classes, the interests, rights and conditions attached to each class of units may differ in relation to fees.

Rights of unitholders

Subject to the Constitution, unitholders are generally entitled to:

- ▶ receive a share of the Trust's distributable income;
- ▶ redeem units;
- ▶ transfer units;
- ▶ switch between Trusts;
- ▶ receive confirmation of investment;
- ▶ receive acknowledgement of units held; and
- ▶ receive annual audited accounts, and inspect the Trust's Constitution.

Remember if you are an indirect investor, you are not a unitholder in the Trusts (your IDPS operator is the unitholder).

Unitholder meetings

Subject to the relevant Constitution, unitholders are also entitled to requisition, attend and vote at unitholders' meetings for any Trust in which they hold units. A unitholder is bound by a resolution of unitholders, whether or not they attend the meeting at which it is passed.

Interest in the Trusts

Each unit issued in a Trust entitles the unitholder to a beneficial interest in the total investments of the Trust but does not give the unitholder an interest in any particular part of the Trust.

Unitholder liability

While the law in relation to unitholder's liability has not yet been settled, each Constitution limits a unitholder's liability in a Trust to the amount the investor has invested or agreed to invest.

Termination of a Trust

The Responsible Entity can terminate a Trust, subject to the *Corporations Act 2001*, at any time by giving prior written notice. If a Trust is terminated, the Trust's assets must be converted to cash where possible and pay or provide for the Trust's liabilities (including those incurred in winding up the Trust and any unpaid fees). The realisation of assets may be postponed.

Unitholders are entitled to a share of the balance of the assets in accordance with the Trust's Constitution. The final distribution of the Trust, which may include both a capital and income component.

Financial information

An electronic copy of the Trust's annual report will be sent to investors each year however, you can request a printed copy of the annual report by contacting Ibbotson.

Borrowings

Under each Constitution, the Trusts are permitted to borrow if necessary, in an attempt to facilitate short-term liquidity and foreign exchange needs and the redemption of units. By virtue of a Trust's exposure to alternative investment strategies, it may be exposed to borrowings and other liabilities. For the Ibbotson Alternative Markets Trust, there is no intention to utilise borrowings.

Distributions

Due to the nature of the investment strategies of the Ibbotson Global Trading Strategies Trust and Ibbotson Alpha Strategies Trust distributions are not expected during the term of the Total Return Swaps (except where net realised gains are earned on a partial realisation of a Total Return Swap in which case a distribution might be paid). If a distribution is made it will automatically be reinvested in additional units.

Distributions for the Ibbotson Alternative Markets Trust will generally be paid quarterly within 15 to 30 days after each 31 March, 30 June, 30 September and 31 December. The amount may vary at each distribution and a Trust may make no distribution for a quarter or the year where there is no taxable income to distribute. Capital gains are generally distributed annually at 30 June. You may choose to have your distribution paid directly to a nominated Australian bank account, building society or credit union account.

Special distributions for the Trusts may be declared outside of these times where necessary to preserve equity between unitholders.

Your distributions for the Ibbotson Alternative Markets Trust will be reinvested where you have notified us in your application form. Any request for distribution reinvestment or cancellation of distribution reinvestment is effective if received by Ibbotson in writing at least seven days (or such other period as determined by us) before the end of the distribution period having been received and accepted by us.

The reinvestment unit price is the price calculated on the distribution date using that day's unit price determined after making an allowance for the income distribution (see page 42 for more information about unit prices). There would normally be no buy/sell spread associated with reinvestment because the assets remain invested in that Trust.

To calculate your distribution, the number of units you own on the relevant entitlement date is multiplied by the distribution cents per unit, as at the distribution date. This method for calculating distributions currently applies to all Trusts and all classes of units.

Unit prices may fall immediately after a distribution, reflecting the income that is paid out to you (see page 42 for more information about unit prices). If you invest just before a distribution, you might get some of your capital back as income. Conversely, if you redeem units just before a distribution, you might be converting what would otherwise be income into a capital gain or a reduced capital loss.

Provided that all income is distributed to unitholders in relation to the year it is earned, a Trust will not pay Australian income tax under current tax law.

You will be assessed on your share of the taxable income of the Trust in the year to which your entitlement relates, even if the income is reinvested into additional units.

Changes to the Trusts

New trusts may be added or existing Trusts may be closed, or the investment objective and risk profiles could be altered. You will be advised of material changes as soon as practicable and within 30 days of making such changes.

Performance information

Investment performance becomes out of date very quickly. As such, past performance information has not been included in this PDS.

If you require up-to-date performance information on the Trusts, please contact Ibbotson using the contact details provided on page 47 of this PDS. Information can be provided to you, including paper copies, free of charge. In assessing any performance information you should bear in mind that past performance is not a reliable indicator of future performance.

Investing in the Trusts

The Trusts accept investments from wholesale investors as defined by section 761G of the *Corporations Act 2001*. The Trusts accept investments from Staff Investors who qualify under internal human resource policies and procedures governing the staff investment program. In this PDS, both wholesale investors and Staff Investors are referred to as Direct Investors in the Trusts.

When you invest in the Trusts, you apply for units in your selected Trust and automatically become a unitholder from the date of issue of units to you, even if the number or price of units cannot be calculated until a later time. The issue of units to you will be subject to your application monies being received and subject to your completion of all identification documentation required under Commonwealth Australian anti-money laundering and counter-terrorism requirements (see page 44). Your money is then managed according to the investment objective and strategy of the relevant Trusts. Please refer to pages 14–20 for details on risks associated with investing, and to pages 5–6 for key features of the Trusts.

If your application monies are not received, either units will not be issued to you or any units which have been issued may be cancelled and you will be deemed not to have been a unitholder. The amount owing, together with any costs and expenses incurred by the relevant Trust as a result of non-receipt of the monies, will be treated as a debt owing to the relevant Trust, units held by you may be redeemed in order to meet that debt.

You may also gain exposure to the Trusts through an IDPS, these investors are referred to as Indirect Investors in this PDS. Please refer to page 46 for more details on Indirect Investors.

Making an initial investment

You can invest directly in the Trusts by completing the application form included at the back of this PDS and the anti-money laundering forms and information (see pages 44) which can be downloaded from Ibbotson's website (see 'AML forms and information' in the 'Document library' section) and paying the application monies. The minimum initial investment and ongoing investment in each Trust is \$500,000, but this amount may be waived and varied.

IBBOTSON GLOBAL TRADING STRATEGIES TRUST AND IBBOTSON ALPHA STRATEGIES TRUST

Application requests will be processed on the Transaction Day of the following month. Transaction Days will be on the last Business Day of each month. Application requests received and accepted are considered a firm commitment to invest in the Trust. Funds committed will need to be received five Business Days before the relevant Transaction Day. You will receive an interest in the Trust as at the relevant Transaction Day, and your units will be issued effective as at that date whether or not the number and value of the units is calculated then or at a later time. Applications will generally pay the entry price calculated as at the close of business on the Transaction Day of the following month (see page 42 for more information about unit prices).

IBBOTSON ALTERNATIVE MARKETS TRUST

Application requests received prior to 11:30 am (Sydney time) on a Business Day, you will generally pay the entry price calculated as at the close of business that day (see page 42 for more information about unit prices). For application requests received after 11:30 am (Sydney time), you will generally pay the entry price calculated as at the close of business on the next Business Day.

The number of units allocated to you is based on the amount invested divided by the entry price. We reserve the right to decline any application that is submitted without the need to give reasons.

Once your application has been processed, a confirmation of your investment showing the amount invested, or which you have agreed to invest, the number of units issued, the entry price and the date the units were issued, will be sent to you usually within five Business Days.

If you do not receive a confirmation, please notify Ibbotson immediately. No interest is received on application monies, including monies for additional investments and no interest will be paid to you if for any reason (such as failure to complete the anti-money laundering forms) your application does not go ahead.

Cooling-off period

Investors who are not wholesale investors are offered a 14 day cooling-off period in respect of investments in the Trusts.

If a cooling-off period applies to you, and you decide that your investment in the Trust(s) is not suitable, you can request in writing to have it cancelled during a 14 day cooling-off period. Your request must state that you are exercising your cooling-off right. The 14 day period commences on confirmation of your investment or five days after your units are issued, whichever is earlier. The amount refunded to you will reflect any change in unit prices, taxes, transaction costs (including buy/sell spreads) and administrative expenses incurred and will not include interest. Accordingly, the amount refunded may be less than the amount you initially invested.

Switching between Trusts

You may switch your investment between trusts subject to the redemption terms. The amount you switch must meet both the minimum redemption and switching investment amounts, which are both currently \$500,000 for the Ibbotson Global trading Strategies Trust and the Ibbotson Alpha Strategies Trust and \$100,000 for the Ibbotson Alternative Markets Trust, but this amount may be waived or varied.

When you switch, you are withdrawing your investment from one trust and reinvesting it in another. To do this, you must complete and return both an application form (from a current PDS) and a redemption form (please contact Ibbotson for a copy of a redemption form if required).

When you request a switch, the units of the trust you switch out of are redeemed at the exit price and the units of the trust you switch into are issued at the entry price at the time of the redemption. These two transactions are completed on the same Business Day, provided notice periods, cut-off times and lock-up periods are met for both sides of the transaction subject to the liquidity of the Trusts. As such, the buy/sell spreads will apply and the value of your investment may have changed. You become a unitholder in the new Trust as at the date of issue of your new units, whether or not the number or value of units can be calculated at that date. Please refer to the details on buy/sell spreads on page 27, and unit prices on page 42 for more information.

Any gain made as a result of switching between trusts may make you liable for tax. It is recommended that you seek professional tax advice before you switch any units. More information on taxation can be found on pages 30–34.

Making additional investments

The minimum additional investment in each Trust is \$500,000 but this amount may be waived and varied. You may make additional investments in the Trusts by completing Part B of the application form included in a current PDS (or another method agreed with Ibbotson) and paying the application monies.

IBBOTSON GLOBAL TRADING STRATEGIES TRUST AND IBBOTSON ALPHA STRATEGIES TRUST

The same terms and conditions for processing initial investments will apply when making additional investments.

IBBOTSON ALTERNATIVE MARKETS TRUST

For additional investment requests received prior to 11:30 am (Sydney time) on a Business Day, you will generally receive the entry price for the Trust calculated at the close of that Business Day. For additional investment requests received after 11:30 am (Sydney time), you will generally receive the entry price calculated at the close of the next Business Day.

Making a redemption

So long as the Trust is liquid, as defined in the Corporations Act 2001, redemption requests will be processed in accordance with the terms and notice periods described below. The maximum redemption periods for the life of investments made pursuant to this PDS are 18 months for the Ibbotson Global Trading Strategies Trust and Ibbotson Alpha Strategies Trust and 180 days for the Ibbotson Alternative Markets Trust. If a Trust is not liquid, you may only redeem from the Trust in accordance with the terms of a withdrawal offer made by the Responsible Entity.

IBBOTSON GLOBAL TRADING STRATEGIES TRUST

You may request to redeem any or all of your units, subject to completion of a 12 month "lock-up" period and one month notification. The lock-up period refers to the 12 months after the date each unit is purchased, during which no redemptions can be made. Once the lock-up period has ended, generally redemption requests will be processed on the Transaction Day of the following month, provided one month's notice has been given. Generally, proceeds from the redemption will be paid to you by the last Business Day of the month following the Transaction Day. However there are risks of delays in pricing and processing redemptions and the redemption payment may be longer.

IBBOTSON ALPHA STRATEGIES TRUST

You may request a redemption of part or all of your units, subject to the completion of the 12 month lock-up period and three months' notification. The lock-up period refers to the 12 months after the date each unit is purchased, during which no redemptions can be made.

Once the lock-up period has ended, generally redemption requests received three months prior to the last Business Day of a calendar quarter will be processed using the unit price effective for the last Business Day of that calendar quarter, otherwise the unit price effective for the last Business Day of the next calendar quarter will be used. Generally, proceeds from the redemption will be paid to you by the last Business Day of the month following the calendar quarter for which the redemption was processed. However there are risks of delays in pricing and processing redemptions and the redemption payment may be longer.

Listed below are examples of how your redemption request would be processed where an initial application has a unit price effective 31 July 2009 and a lock-up period ending 31 July 2010 (inclusive of that date).

1. Redemption requests received by Ibbotson within the lock-up period

A redemption request received by Ibbotson on 1 June 2010 will be processed using the unit price of 30 September 2010.

A redemption request received by Ibbotson on 30 July 2010 will be processed using the unit price of 31 December 2010.

2. Redemption requests received by Ibbotson after the lock-up period

A redemption request received by Ibbotson on 19 August 2010 will be processed using the unit price of 31 December 2010.

A redemption request received by Ibbotson on 1 October 2010 will be processed using the unit price of 31 March 2011.

IBBOTSON ALTERNATIVE MARKETS TRUST

You may request to redeem any or all of your units on any Business Day. For redemption requests received prior to 11:30 am (Sydney time) on a Business Day, you will generally receive the exit price calculated as at the close of business that day. For redemption requests received after 11:30 am (Sydney time), you will generally receive the exit price calculated as at the close of business on the next Business Day. Generally, proceeds from the redemption will be paid to you within six Business Days following the receipt of your original request. However there are risks of delays in pricing and processing redemptions and the redemption payment may be longer.

The minimum amount that may be redeemed from the Ibbotson Global Trading Strategies Trust and Ibbotson Alpha Strategies Trust is \$500,000 or the balance of your investment in the Trust if the redemption request results in a balance less than \$500,000. The minimum amount that may be redeemed from the Ibbotson Alternative Markets Trust is \$100,000 or the balance of your investment in the Trust if the redemption request results in a balance less than \$100,000. We have discretion to waive and vary the minimum redemption amount.

Your redemption form must be completed and returned to Ibbotson in writing (please contact Ibbotson for a copy of a redemption form if required).

The number of units redeemed is based on the amount redeemed divided by the exit price. Please refer to unit prices on page 42 for more information.

The price of your units will continue to be subject to movements in the value of the Trust from the date you lodge your redemption request until the next relevant Transaction Day on which the withdrawal is processed.

Under each Constitution, redemption proceeds will be paid as soon as practicable after redemption. In exceptional circumstances redemptions may take longer than the periods described above. This may occur where it is impractical to calculate the unit prices, where other unitholders may be disadvantaged by a redemption where a delay is in the best interests of all unitholders, or as otherwise permitted by the relevant Constitution and the law.

Where underlying Trust assets can only be realised after a substantial notice period, as is the case with some of the alternative strategies, this could also lead to a longer redemption time. If the liquidity of underlying Trust assets prohibits payment of part or all of your redemption proceeds in cash, then you may be required to receive part or all of your redemption proceeds in specie, meaning you may need to retain units in an illiquid Trust until such time as the underlying assets can be realised.

Redemption of units could make you liable for tax on any gain. It is recommended that you seek professional tax advice before you redeem units. More information on taxation can be found on pages 30 — 34.

Transferring units

You may transfer units to another person at any time providing appropriate consent has been obtained. However, you may be required to complete appropriate anti-money laundering forms. Please contact Ibbotson for further information.

Transferring units from one unitholder to another could make you liable for tax on any gain and government duties may be payable on the transfer. It is recommended that you seek professional tax advice before you transfer any units. More information on taxation can be found on pages 30–34.

Unit prices

The unit price is calculated by dividing the Net Asset Value (NAV) of each Trust by the number of units on issue in that Trust at the relevant time plus an allowance for transaction costs (including the buy/sell spread). Please refer to page 27 for information on buy/sell spreads.

Where a Trust has more than one class of unit, the unit price of each class of unit in a Trust is calculated by dividing the NAV of that class of unit by the number of units on issue in that class at the relevant time plus an allowance for transaction costs. The NAV of a class is calculated as if there was a separate Trust corresponding to the class of unit.

Valuations are normally undertaken on each Business Day for the Ibbotson Alternative Markets Trust and on a monthly basis for the Ibbotson Global Trading Strategies Trust and the Ibbotson Alpha Strategies Trust. Unit prices for Trusts exposed to alternative investment strategies will generally reflect the last available valuation.

Units are priced on a 'forward' basis. Under this method unit prices are struck using values available at the next valuation after the processing time. This minimises exposure to market timing practices, i.e. where a unitholder gains from price movements known but not reflected in the unit price. This forward pricing methodology is considered industry best practice.

Valuation

Under each Constitution, the value of any property will be its current market value determined by reference to a recognised independent source, or by a method determined by a qualified independent valuer, or any other appropriate method which is capable of being verified independently by a registered company auditor including (but not limited to) estimates of value based on objective criteria, where actual figures are not available and where there will be no significant detriment to any unitholder. Trust property may be revalued whenever it is thought fit. Property acquired must be valued at cost (including acquisition cost) until revalued.

Under each Constitution, discretion may be exercised which can impact unit prices. The manner in which these discretions are exercised are outlined in the unit pricing policies.

Additional information

Unitholders may obtain a copy of these unit pricing policies (and any records ASIC requires) free of charge upon request.

Information on request from Ibbotson

You may contact Ibbotson between 9:00 am and 5:00 pm (Sydney Time) on any Business Day to assist with any questions you might have, or further information you may require, in relation to your investment in the Trusts. Ibbotson's contact details are shown on page 47.

If you are an Indirect Investor the following information does not apply.

Changing your details

You must inform Ibbotson of any change to your details, including contact details, distribution instructions, bank account details or account operating instructions.

To advise changes, please complete the relevant sections of the application form at the back of this PDS and forward it to Ibbotson. A confirmation of these changes will be sent to you.

Confirmation of transactions and reporting

You will be provided with a confirmation of your transaction once it is processed, usually within five Business Days after you have supplied all relevant information required. This may be when you make your initial investment, additional investment, redemption, switch or transfer or if the terms of the Trusts are varied. A quarterly statement detailing your transactions over the period, including any distribution will be sent to you. At the end of each financial year you will be sent a statement for tax purposes and financial statements for the Trusts. If at any other time you would like a transaction statement of your investment and unit price information, please contact Ibbotson.

Privacy statement

By applying to invest in the Trust, you consent and agree to information about you being obtained and used by the Responsible Entity, Ibbotson and other parties as explained in this privacy statement. This privacy statement applies to individuals who invest directly in the Trusts. The type of information held includes your name, address and other information that you provided when opening your account as well as records of your account transactions and the value of your unitholding.

Your information may be used to:

- ▶ provide the products and services you request;
- ▶ efficiently manage and administer all investments and services provided; and
- ▶ ensure that internal business operations run smoothly, which may include fulfilling all legal requirements and conducting confidential systems maintenance and testing.

Your personal information may be provided confidentially to external service providers, including the custodian, auditors, taxation and legal advisers and information technology consultants.

Unless you inform otherwise, your personal information may also be provided to Ibbotson's and the Responsible Entity's related parties or used to inform you of products and services offered by any related parties. Additionally, information will be disclosed if required by law to do so (including under legislation in relation to anti-money laundering and counter-terrorism), or if you provide your consent.

If you don't wish information to be sent to you about other products managed by Ibbotson, please note this in the relevant box provided on your application form or contact Ibbotson on the contact details shown on page 47.

Every effort is made to ensure that the personal information retained about you is accurate, complete and up-to-date. If you provide incomplete or inaccurate information you may not receive the products or services you are seeking.

You can request access to your personal information that we have on record. If you believe that any information is incorrect or out of date, you may ask for it to be corrected. There is no fee for requesting access to your information.

If you do not provide this information, your transactions may not be processed, units may not be issued to you within the time periods contemplated in this PDS, or redemption payments may not be made until the information requested has been received.

The privacy policy can be found on Ibbotson's website, alternatively contact Ibbotson on the details shown on page 47 to request a free copy.

Commonwealth anti-money laundering and counter-terrorism requirements

The Responsible Entity and Ibbotson are required by the Commonwealth Anti-Money Laundering and Counter-Terrorism Financing Act 2006 to obtain additional information from new investors as to their identity, source of funds and similar matters, and to verify that information by sighting appropriate documentation. These requirements may also apply in relation to existing unitholders.

Forms relating to the additional information required, and the way in which that information can be verified, are on Ibbotson's website. For example, individuals will be required to produce a current photographic identification document such as a current passport or driver's licence, or to provide a certified copy of the document, in order to verify their identity details. Information as to who is allowed to certify the copy of the original document will also be provided on Ibbotson's website (see 'AML forms and information' in the 'Document library'). Alternatively contact Ibbotson to request a free copy.

The Responsible Entity and Ibbotson reserve the right to request such information as is necessary to verify the identity of any applicant and their personnel (for example, if a unitholder is a company, the identity of the company directors may need verification) and to assess the likelihood of the investor or their staff being involved in anti-money laundering or counter-terrorism financing (risk assessment).

Information that you provide may be disclosed to the Australian Transaction Reports and Analysis Centre under Australian law (or by investment managers resident in other countries who are subject to similar legislation in their own countries). You may not be informed if such a disclosure is made. Otherwise the information will be confidential.

If you do not provide the required information, your transactions may not be processed, units may not be issued within the time periods contemplated in this PDS, or redemption payments may not be made until the information requested and all anti-money laundering checks have been completed.

By applying for units through this PDS, you also agree that in the event of your delay or failure to produce information requested for anti-money laundering purposes appropriate action may be taken. In particular, your application may be refused and units may not be issued to you, the transfer of units you wish to sell or purchase may be refused, any units which have been issued to you may be cancelled or redeemed if it is believed such action to be necessary or desirable in light of obligations under the Commonwealth Anti-Money Laundering and Counter-Terrorism Financing Act 2006 or any related legislation.

Complaints

Ibbotson aims to provide you with quality ongoing service and has established procedures for dealing with complaints. If you are a Direct Investor and are dissatisfied or have a complaint about your investment in the Trusts, in the first instance please contact Ibbotson Client Services.

If you find the response is not satisfactory, you may send a written complaint addressed to:

Client Services

Ibbotson Associates Australia Limited
Level 36, Australia Square
264 George Street
Sydney NSW 2000

Your written complaint will be acknowledged within three Business Days of receipt and Ibbotson's Client Services team will make every effort to resolve your complaint within 21 days of receipt.

If you are still not satisfied, you may refer the matter to the Financial Ombudsman Service (FOS) of which Ibbotson and the Responsible Entity are members. FOS is an independent dispute resolution body whose services are free to complainants. In order for FOS to consider your complaint, the claim must be less than \$150,000 (unless it has otherwise been agreed with you in writing). Ibbotson and the Responsible Entity are bound by the decisions made by FOS. The contact details for FOS are:

Financial Ombudsman Service

GPO Box 3
Melbourne VIC 3001
Tel: 1300 780 808
Fax: (03) 9613 6399
Email: info@fos.org.au
Web: www.fos.org.au

Consent

Macquarie have given their written consent and, as at the date of this PDS, not withdrawn such consent to be included in this PDS in the form and context in which they are included.

Investment by the Responsible Entity

The Responsible Entity, or one of its related body corporates, may invest in the Trust in its capacity as the trustee of other investment and superannuation funds. Any investment would be at commercial fee rates which may represent lower fees than those currently specified in the table in page 22.

Indirect Investors

This section only applies to investors who are investing in the Trusts through an IDPS, ie as an Indirect Investor in the Trusts. If you are investing through an IDPS, your application should be made using the forms provided by your IDPS operator only. Do not use the forms provided in this PDS. Please consult your adviser or IDPS operator if you are uncertain if this applies to you.

If you are investing in any of the Trusts through an IDPS operator, you are directing the operator of that IDPS to arrange for your monies to be invested in the Trusts on your behalf. Accordingly, you:

- ▶ are not a Direct Investor in the Trusts;
- ▶ are not registered as a unitholder in the Trusts;
- ▶ do not receive distributions of income, tax statements or reports directly from Ibbotson (as these will be made to your IDPS operator or its custodian); and
- ▶ are not entitled to receive notice of, attend or vote at unitholder meetings or participate directly in the winding up or termination of any of the Trusts.

The operator of that IDPS acquires those rights and can exercise, or decline to exercise them, on behalf of Indirect Investors.

References in the PDS to 'you' or 'your' should be read as references to your IDPS operator, as the context indicates.

Your IDPS operator will be responsible for confirming transactions, providing reports and responding to your enquiries. You should refer to your IDPS operator as the first point of contact regarding any enquiries about your investment (and for any issues that remain unresolved, contact the complaints scheme of which they are a member). You will also need to notify your IDPS operator of any changes in your details.

Please refer to the IDPS operator for information on:

- ▶ how to invest or make additional investments or switch between Trusts (as you do not complete the application form included in this PDS or any Ibbotson forms);
- ▶ the minimum initial investment, additional investment, or switching amounts;
- ▶ how to redeem investments and the minimum redemption amounts;
- ▶ details of cooling-off rights (if any) that may apply to your investment in the IDPS; and
- ▶ any additional fees charged by your IDPS operator that may apply.

Indirect Investors should read the guide provided by the IDPS operator and should also seek appropriate professional taxation and investment advice.

We are not responsible for the operation of an IDPS.

Application checklist

The following information is required to process your application and administer your investments. Please check that you have completed the following sections of the application form as specified. If you are a new investor please ensure you have provided the additional information required by Commonwealth Anti-Money Laundering and Counter-Terrorism requirements. Applications can only be accepted when all necessary information is received and we retain the right to decline applications without the need to give reason.

Part A – Investor information

Investor details

- ▶ Complete the full details as specified.
- ▶ Trust or superannuation fund investors must include the name of the trustee or responsible entity as well as the trust or fund name, and the Australian Business Number (ABN) of the trust or fund.
- ▶ Nominate your details as an existing or new investor as specified.

Contact details

- ▶ Provide the details of the person to whom reports and other information should be sent.

Distribution instructions

- ▶ Tick your choice in the relevant box.

If no election is made, your distribution will be reinvested in additional units.

Account details

- ▶ Complete the account details into which all payments, including distributions (if this option is chosen) will be paid.
- ▶ If banking details are not provided, all payments will be sent to the address provided in the contact details on Part A of the application form.

Tax File Number (TFN) notification

- ▶ Complete your TFN or exemption as appropriate.
- ▶ Trust or superannuation funds' TFNs should be used rather than that of the responsible entity or trustee.

Investment operating authority

- ▶ Ensure the form is signed by all signatories on behalf of the investor.
- ▶ Indicate the number of signatories required to sign on behalf of the investor or any other signing requirements.
- ▶ If insufficient space, please attach a separate sheet.

Anti-Money Laundering legislation requirements

- ▶ If you are a new investor, please go to Ibbotson's website (see 'AML forms and information' in the 'Document library') for the anti-money laundering forms you will need or contact Ibbotson for assistance.
- ▶ Read the warranties carefully.

Declarations and indemnity

- ▶ Read the declaration carefully.

Authorisation of application form Part A - investor information

- ▶ Ensure that the investor information has been signed and dated by the appropriate signatories.

Part B – Transaction information

Investor details

- ▶ Nominate your details as an existing or new investor as specified.
- ▶ Trust or superannuation fund investors must include the name of the trustee or responsible entity as well as the trust or fund name.

Trust investment allocation

- ▶ Complete your allocation details including the dollar amount to be invested in each Trust.
- ▶ Indicate for each allocation whether this is an initial or additional investment.
- ▶ Specify the total amount of your investment.

Method of payment

- ▶ Indicate your method of payment for your investment (investors making additional investments only need to complete this section if the method of payment is different from that advised at the time of initial investment).
- ▶ Ibbotson does not accept payment by cheque.

If you require assistance in completing the application form, please contact Ibbotson on the contact details shown on page 47 of this PDS.

Please fax your application form to: 02 9276 4560

Application form

Part A – Investor information (continued)

4. Account details into which all payments, including redemptions and distributions (if chosen) will be made

You can nominate an Australian bank, building society or credit union account that is held in your name(s)

Financial institution name:																				
Branch name:																				
Branch address:																				
Account name:																				
Branch No. (BSB):				/																
Account number:																				

5. Tax file number (TFN) notification *optional*

TFN or Exemption:																				
Exemption Reason:																				

Note:
Provision of your personal, Trust or Superannuation Fund TFN is not compulsory. However, if you choose not to provide this information, we are required to deduct tax from your distribution at the highest marginal rate plus Medicare levy. The collection, use and disclosure of TFNs is strictly regulated by tax laws and the Privacy Act.

6. Investment operating authority

The people whose names and signatures appear below are authorised to deal with your investment in the Ibbotson Alternative Trusts. Ibbotson and the Responsible Entity may accept and act upon notices, instructions and requests from these people, until written notice is received advising new authorities. Ibbotson will confirm receipt of new written authorities - please notify Ibbotson if this confirmation is not received (if insufficient space, please attach a separate sheet).

Title	Given Name(s)	Surname	Signature	Date

Please tick (✓) the relevant box.

7. Anti-money laundering legislation requirements

Application form

Part A – Investor information (continued)

If you are investing in the Trusts for the first time, please complete and send to Ibbotson, the anti-money laundering form/s on Ibbotson's website and any relevant supporting documentation. This information may need to be verified or additional information may be required from you in which case, Ibbotson will contact you for further details.

Warranties as to Commonwealth Anti-Money Laundering and Counter-Terrorism - for both existing and new investors

(Terms used in this section are defined on Ibbotson's website – see 'AML forms and information' in the 'Document library'. Alternatively contact Ibbotson on the details shown on page 47 to request a free copy.) Where the Trusts invest in overseas funds which are subject to US legislation, the investment managers need to know that the investors in the Trusts are not involved in money laundering so that those managers can meet their own anti-money laundering obligations under US law.

Therefore, by making this application, you represent and covenant that neither you, nor any Related Person, is:

- ▶ a person or entity whose name appears on the US Specially Designated Nationals List;
- ▶ a Non-US Shell Bank;
- ▶ a person or entity resident in, or whose subscription funds are transferred from or through, an account in a Non-Cooperative Jurisdiction;
- ▶ a Senior Non-US Political Figure;
- ▶ a member of the Immediate Family of a Senior Non-US Political Figure;
- ▶ a Close Associate of a Senior Non-US Political Figure;
- ▶ resident in, organised or chartered under the laws of, a jurisdiction that has been designated by the Secretary of the Treasury under Section 311 or 312 of the USA PATRIOT Act as warranting special measures due to money laundering concerns;
- ▶ entities and/or their persons that are subject to economic sanction including, without limitation, all applicable sanctions regimes promulgated by the United Nations, the European Union, the U.S. Office of Foreign Assets Control, and/or any other applicable jurisdiction's economic sanctions laws; and

that the funds that you are investing do not originate from, nor will be routed through, an account maintained at a Non-US Shell Bank, an 'offshore bank' or a bank organised or chartered under the laws of a Non-Cooperative Jurisdiction. You agree to notify us promptly of any change in information affecting any of these representations and covenants.

8. Declarations and indemnity

- ▶ I/We have received, read and understood the PDS for the Ibbotson Alternative Trusts dated 15 April 2010.
- ▶ I/We agree to be bound by the terms and conditions set out in the PDS for the Trusts, the terms of the Trusts' Constitutions and the law and any agreement between the Responsible Entity, Ibbotson and myself/ourselves, in each case as amended from time to time.
- ▶ I/We agree to the 12 month lock-up period that applies to all monies I/we invest in the relevant Trust, from the date I/we purchase each unit. I/We acknowledge this means that I/we will not be able to redeem during the first 12 months for each unit I/we purchase.
- ▶ I/We authorise you to automatically redeem any of my/our units in order to fund payment of your performance fees owing as set out in the PDS. I/we acknowledge and agree that I/we will not receive any invoice in connection with payment of your performance fees and acknowledge and agree that I/we may become liable for capital gains taxes upon redemption of units to fund any such performance fees.
- ▶ I/We acknowledge that investments in the Trusts are not deposits with or other liabilities of the Responsible Entity, or of any related corporation of the Responsible Entity, and are subject to investment risk, including possible delays in repayment and loss of capital invested.
- ▶ I/We further acknowledge that neither Ibbotson, the Responsible Entity, nor any of their related companies, directors, officers, counterparties, or external service providers, guarantee that my investment will gain or retain its value, guarantee the repayment of capital or guarantee the performance of any of the Trusts.
- ▶ I/we consent to receive any requisite notifications electronically (or as preferred by Ibbotson).
- ▶ I/We declare that all details given in this application form are accurate and complete and that I/we have the power to invest in the Trust(s).
- ▶ I/We am/are an Australian resident and received and accepted this offer in Australia; OR I/We:
 - ▶ am/are a NZ resident wholesale investor and not a recipient of any offer to the public in NZ in relation to the Trust(s);
 - ▶ acknowledge that the PDS is prepared for Australian residents and that some of the information may not be relevant; and
 - ▶ will seek my/our own legal advice in relation to the contents of the PDS.
- ▶ I/We agree to give further information or personal details to the Responsible Entity if it reasonably believes that they are required to meet its obligations under anti-money laundering, counter-terrorism or taxation legislation. By making this application, I/we represent and covenant that the funds I/we are investing are not the proceeds of crime, money laundering, nor connected with the financing of terrorism.

Application form

Part A – Investor information (continued)

- ▶ I/we agree that the Responsible Entity may in its absolute discretion determine not to issue units to me/us, refuse to transfer units from or to me/us, may cancel any units which have been issued to me/us or may redeem any units issued to me/us if the Responsible Entity believes such action to be necessary or desirable in the light of its obligations under the Commonwealth Anti-Money Laundering and Counter-Terrorism Financing Act 2006 or any related legislation.
- ▶ I/We declare that I am/we are not commonly known by any other names different from those disclosed in this application form.
- ▶ I/We declare any documents or information used for verification purposes in support of my/our application are complete and correct.
- ▶ I/We acknowledge that it may be a criminal offence to knowingly provide false, forged, altered or falsified documents or misleading information or documents when completing this application.
- ▶ I/We acknowledge that if I/we fail to pay the full amount of the application monies in respect of the units the subject of this application either at the same time as making this application, or by any later date agreed with us, the amount owing together with any costs, expenses or damages incurred in relation to the Trust or Trusts as a result of the non-payment, shall be a debt payable by me/us to the Responsible Entity in relation to the relevant Trust or Trusts for which the Responsible Entity may seek compensation, and either no units will be issued to me/us or any units which have been issued may be cancelled or redeemed by the Responsible Entity in its discretion.
- ▶ I/We agree to meet the costs, expenses or penalties incurred by a Trust(s) in relation to the realisation of Trust assets to meet any redemption request I/we make, or any request for redemption proceeds to be paid to me/us by a particular method, and any other costs, expenses, losses, liabilities or damages incurred by the Responsible Entity or a Trust on my/our behalf, or other amounts owing by me/us to the Responsible Entity in relation to any Trust, and to repay any amount paid by the Responsible Entity to me/us in error. I/We authorise the Responsible Entity to redeem my/our Units in order to meet such costs, expenses, penalties, losses, liabilities, damages or other amounts owing in respect of any Trust and in order to meet any outstanding management fees or performance fees payable by me/us to you.
- ▶ I/We indemnify the Responsible Entity and its agents (including Ibbotson) in respect of any loss, claim or liability incurred by any of them relying on or acting pursuant to this application form or any notices, instructions and requests received by persons listed in section 6 of Part A of this application form.
- ▶ I/We agree that, if I/we have provided an email address in section 2 of Part A of this application form that the Responsible Entity (and any of its agents appointed for this purpose) may correspond with me/us using the email address provided for any purpose related to the administration of my investment in the Trusts.
