Investment Summary

Investment Objective

Aims to maximise outperformance relative to the benchmark (MSCI All Country World ex-Australia Index with Net Dividends Reinvested (A\$ Hedged)) over rolling five year periods, by investing predominantly in listed international shares, supplemented by a passive currency overlay.

Multi-Manager Trust

Ibbotson selects specialist and complementary active managers, with varying investment styles, that are expected to deliver superior investment returns in excess of their performance benchmarks.

Available to wholesale investors, and indirectly to retail investors via select retail platforms.

Diversified International Shares

The portfolio is invested in listed international shares across developed and emerging markets. It also utilises a passive currency overlay manager to hedge its currency exposure.

Key Attributes

Access to numerous specialist international equity managers, ordinarily not available to Australian investors.

Access to skilled, high conviction managers that are capable of generating superior long-term performance potential.

Risk control through packaging a combination of managers with varying investment styles.

The ability to identify exceptional managers throughout the world is assisted by our access to global resources.

Operations

Quarterly Commentary

The Ibbotson International Shares High Opportunities (Hedged) Trust ('HOT') underperformed its benchmark by -0.8% in the December quarter. HOT's return was 7.4% relative to the benchmark return of 8.2%. Underperformance was largely driven by negative sector selection. Sector allocation detracted due to HOT's significant underweighting to Energy, which was clearly the best performing sector. Stock selection was neutral overall with Energy, Healthcare, Information Technology and Telecommunication Services delivering positive contributions with this being, offset by negative stock selection in Consumer Discretionary and Industrials. At a manager level, contrarian manager Marathon (who has the largest weight in HOT) was the main driver of the underperformance, while Sands Capital (a growth manager) was the most notable outperformer.

Manager Weightings

Manager	Style	%
Marathon	Contrarian (global)	42.6
Altrinsic	Value (global)	25.4
Axiom	Growth (global)	17.2
Sands Capital	Growth (global)	14.8
Others	Other	0.1
Omega	Passive currency overlay	N/A

Manager Styles

Contrarian: An approach that often includes holding stocks currently out of favour with the market.

Value: An approach that focuses on selecting stocks that are regarded as relatively cheap based on various price measures.

Growth: The focus is on selecting stocks that are regarded as having above average earnings potential.

Passive currency overlay: Managed by Omega with the aim of neutralising the portfolio's currency exposure by closely tracking the currency basket of the benchmark index.

Notes

1. Performance measures are expressed after fees, costs and before taxes. Performance may not sum due to the rounding of individual components. Trust inception date 2 March 2007, performance reporting commenced March 2007.

2. Allocations may not add up to 100% due to the rounding of individual components.

3. The Management fee is inclusive of GST (after taking into account Reduced Input Tax Credits) and can be negotiated for direct investors. Refer to the current disclosure document for more information on fees and costs.
